ASSESSMENT WORK REPORT

ON THE BEN 1-35 and CLOVER LEAF 1-4

INTRODUCTION

This report covers a geochemical soil survey and magneto-meter survey by White, Radvak & Associates Ltd., for Cosmic Nickel Mines Ltd., on the Ben 1-35 and Clover Leaf 1-4 Claims located in the New Westminster Mining Division.

LOCATION

The 39-claim group is approximately 12 miles north of Agassiz and 9 miles southwest of Giant Mascot Mines. The property is at latitude of  $49^{\circ}22'$  and longitude of  $121^{\circ}37'$

GENERAL GEOLOGY

Part of the property covers a norite ultrabasic rock with the surrounding rock being mostly volcanics and slates. A northerly fault zone along the Ruby Creek with extensive serpentinization and talc signifies structural similarities to the ore control at Giant Mascot Mines.

TELEPHONE 681-4020

2.

The intrusive diorite east of Ruby Creek is related to the Coast Range Batholith. The diorite intrudes the regionally metamorphosed Paleozoic sediments. The local rocks within the claim group area are diorite, talc, serpentine, gabbro, granite, schists and pyroxinite.

GRID PREPARATION

A control base line was cleared and flagged in the north-south direction and east-west direction. North-south and east-west lines were cleared and flagged at 200-foot centres. Grid lines and claim lines were surveyed by using a chain and a Brunton compass.

GEOCHEMISTRY AND SAMPLING

All the soil samples taken at 200-foot intervals were assayed for copper and nickel. Samples were taken from the gray (C) zone and placed in soil sample bags provided by Technical Service Laboratories, 325 Howe Street, Vancouver, B.C. The grid pattern used was marked on each sample bag. A total of 252 samples were taken and analyzed for copper and nickel.

PERSONNEL

Mr. Claus Richter of North Vancouver, and Mr. Jim Rutter of West Vancouver performed the work in the field and were supervised by S. Radvak, P. Eng.

DETAILED COSTS - July 6 to October 15, 1970.

July 6	Assays	\$ 76.54
July 6	Charter Truck and Trailer Rentals	600.00
July 6	Claus Richter (Expense Advance)	100.00
July 31	Claus Richter (July fee)	840.00
Aug 3	Claus Richter (Auto expenses)	47.05
Aug 3	Claus Richter (Meals)	20.40
Aug 3	Claus Richter (Engineering Expense)	8.54
Aug 4	Ray Brooks - wages (15 days @ \$20.00)	300.00
Aug 4	Gordon Broughall - wages (15 days @ \$20.00)	300.00
Aug 24	Kent Hotel - Board & Room - employees	283.90
Aug 24	Steve Radvak - engineer's fees (July, August)	200.00
Aug 24	Gordon Broughall - wages (20 1/2 days)	410.00
Aug 24	T.S.L. Laboratories (Assays)	346.50
Sept 14	Crest Laboratories (Assay)	83.30

5.

RESULTS

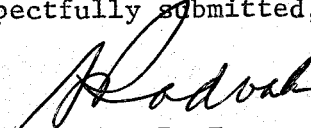

The results of the surveys are presented on separate maps for the magnetometer, copper and nickel soils (p.p.m.)

An overlapping copper-nickel anomaly has to be investigated further by stripping, if shallow, or by an induced polarization survey.

Assessment work should be recorded and the encouraging results investigated further.

Although there is pyrrhotite with the copper-nickel float, the magnetometer did not show an anomaly corresponding to the soil sampling. The main Peace River Power Line passes within 200-feet of the soil anomaly, so that care must be taken using an Induced Polarization instrument here.

Respectfully submitted,

  
S. RADVAK, P. Eng.
