SUMMARY

A Geochemical soil sampling programme was carried out on the Nite 1-16 claim group held by North Bay Mines and Oil Limited.

Initial results show a copper anomaly on Nite 13 claim along with smaller anomalies on claims 10, 12, 14 and 16. Granodiorite float with chalcoppyrite and malachite was found on the Nite 14 claim.

*Malachite  
Float*

The recommended programme of stripping and percussion drilling should be started as soon as possible.

ASSESSMENT WORK REPORT  
ON THE NITE 1 - 16 GROUP OF CLAIMS  
KAMLOOPS MINING DIVISION

INTRODUCTION

This report covers the first phase of the exploration programme on the Nite group of claims. A geochemical soil survey has been completed by White, Radvak & Associates for North Bay Mines and Oils Limited.

LOCATION & ACCESS

The Nite 1-16 group of claims is approximately 9 miles northwest of Craigmont Mines Limited and 2 miles northeast of the Nicola River. The claims are accessible from the Spences Bridge-Merrit Highway.

The property is more closely located by a latitude of  $50^{\circ}20'$  and a longitude of  $121^{\circ}5'$ .

GENERAL GEOLOGY

The claim group is underlain by the Chataway series of granodiorite. Overburden is fairly heavy with little outcrops. Some granodiorite float was found on the property

- 2 -

containing chalcopryrite and malachite staining. Outcrops are all granodiorite.

GRID PREPARATION

Two control base lines were blazed and flagged in the east-west direction and 3000 feet apart. Pickets were installed at 400 foot centres in north-south and east-west directions and marked as shown on Soil Sampling Map (scale 1" = 600 ft). Grid lines and claim lines were surveyed by using a chain and a Grunton compass.

GEOCHEMISTRY & SAMPLING

All the samples taken at 300 foot intervals were analyzed for copper at the Technical Service Laboratories, 325 Howe Street, Vancouver, British Columbia. The samples were taken from the gray (C) zone by digging holes with a mattock and shovel. Paper soil sample bags were used for the samples taken. The grid pattern used in the field was marked on the bag to correspond with the plan. A total of 231 samples were taken from the property.

PERSONNEL

The project was supervised by S. Radvak, P. Eng., Mr. Claus Richter, of North Vancouver, and Mr. Jim Rutter, of West Vancouver, performed the field work.

DETAILED COSTS

June 6 - June 15th incl.

C. Richter - \$35.00 per day 10 x \$35.00	350.00
Jim Rutter - \$25.00 per day 10 x \$25.00	250.00
S. Radvak - 4 days at \$75.00	300.00
Soil Maps	40.00
Assays	288.75
Car Rental - 10 x \$9.00	90.00
Motel - 12 x \$9.00	108.00
Meals - 14 x \$9.00	126.00
Gas	80.00
Pickets and Flagging	40.00
	<u>1,672.75</u>

Assessment credit is \$1600.00.

Declared before me at the *City*  
of *Vancouver*, in the  
Province of British Columbia, this *10*  
day of *Dec.* 1970, A.D.

- 4 -

RESULTS

The results of the geochemical survey are presented on a map scaling 1" = 600 feet. The copper determinations are shown as parts per million. Claim number 13 shows the most promise to date with an anomalous area almost 1500 feet by 1200 feet. Claims 10, 12, 14 and 16 also show fair readings.

Since float showing chalcopyrite and malachite along fractures was found on claim 14, the property warrants further work.

RECOMMENDATIONS

Build access road into claim #13 and complete a limited amount of trenching to expose the bedrock within the anomalous area. Drill percussion holes at 250 foot centres over the anomalous areas and assay for copper. This would be the cheapest way of determining the initial potential of the property.

- 5 -

COSTS

Roads	4,500.00
20 days' trenching	6,400.00
Camp and equipment	3,000.00
Percussion Drilling at 400' centres -	
12 x 250' = 2800' @ 4.00	11,200.00
10 x 200' = 2000' @ 4.00	8,000.00
Assaying	2,000.00
Prospecting & Mapping	3,000.00
Supervision & Engineering - 3 months	4,500.00
Vehicle - 3 months	<u>1,000.00</u>
	\$ 43,600.00

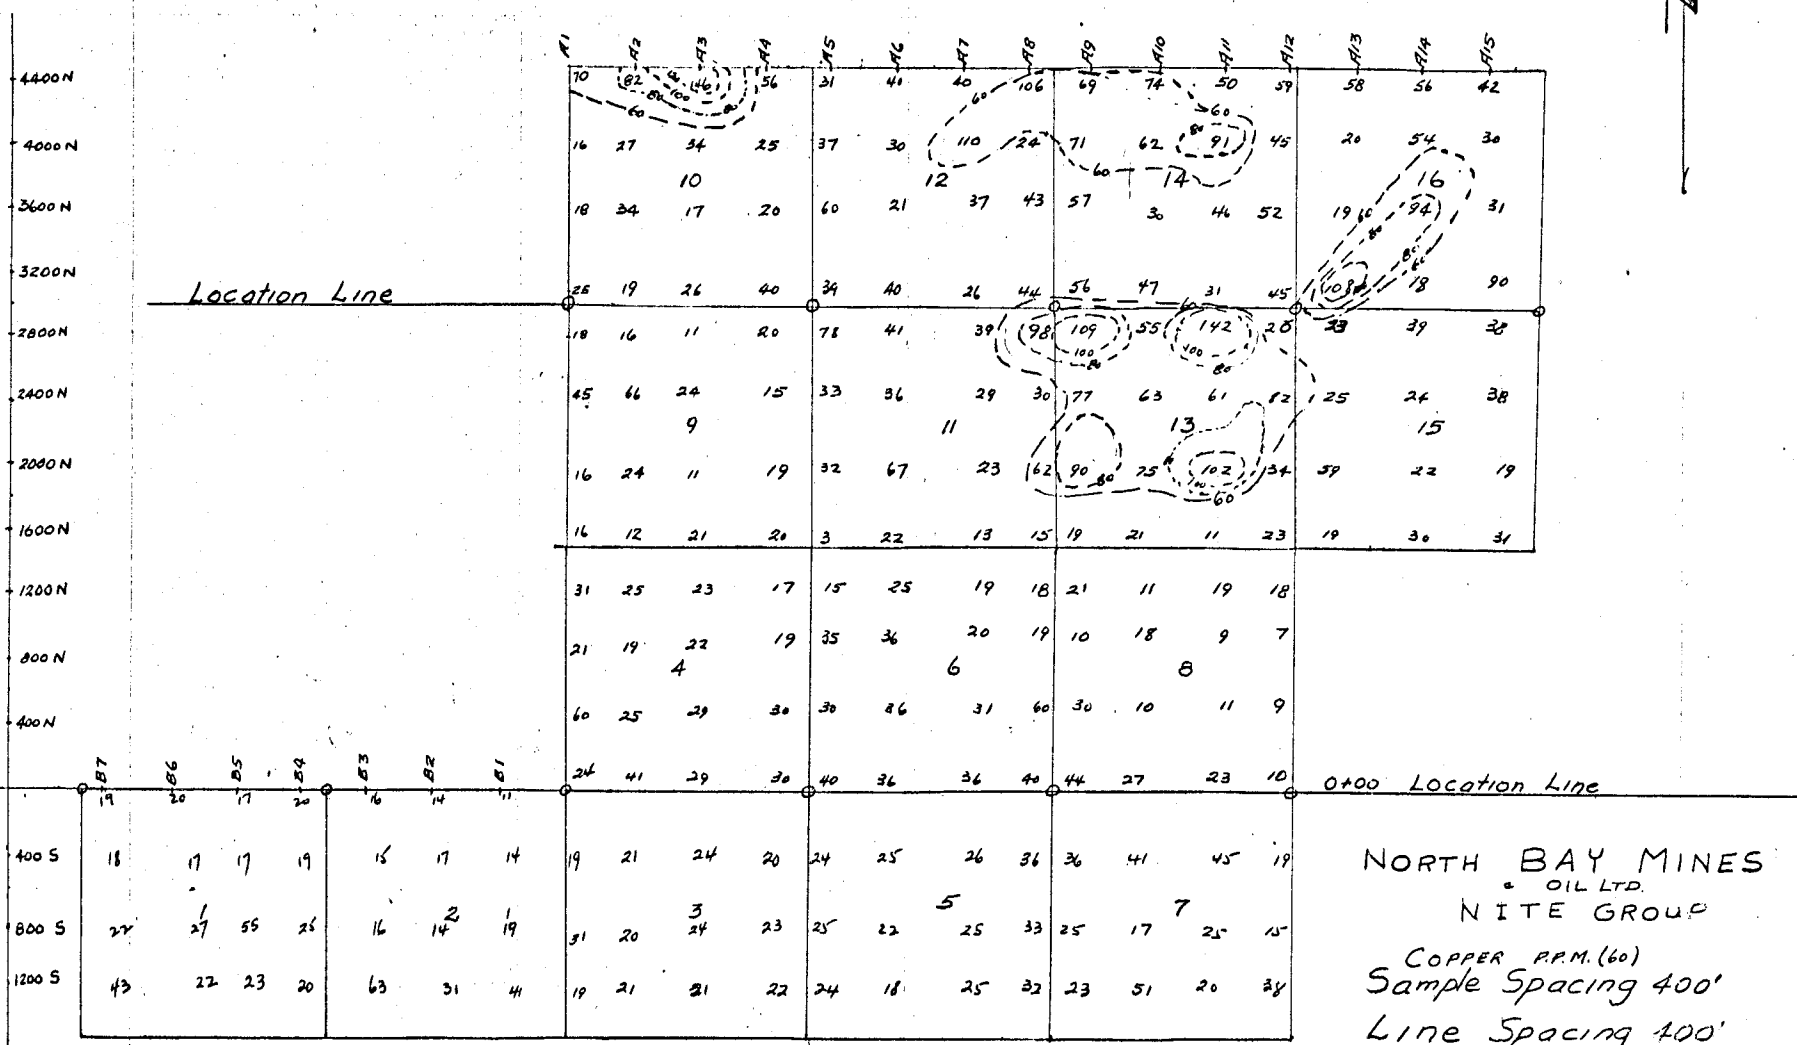

This next phase of the programme is recommended.

Respectfully submitted,
