ASSESSMENT REPORT
NO. 5125 MAP #1

O marks test holes & approximate size.
X marks mineral showings.
Constance Melnicko.

Numbered Mineral Showings marked on maps, &
Bedrock one described here:

1243.

Rock face, or bluff, about 50 ft x 20 ft.
showing a lot of green copper oxide, with
calcopyrite, iron pyrite, and magnetite. A lot
of work done here hand drilling, digging,
and picking.

4. Molybdenum in quartz and granite
- 5+6. Molybdenum & iron pyrite in granite.
7. Molybdenum in quartz and granite
8. Molybdenum in quartz and granite.
9. Molybdenum in quartz and granite
10. Molybdenum & iron pyrite in quartz & granite.
11. Silver, lead & zinc, molybdenum & iron pyrite
in granite.

Molybdenum seems to appear mainly in quartz
seams. Overburden makes it difficult to
determine the extent of these showings.
Work done was for the purpose of prospecting,
hand drilling, for test holes, digging and
picking, etc.

Inio Mineral Claims

Prospecting Report #5125.

- (1) The rock in the bluff on Inio #1 and 2 claims appears to be a sedimentary sericite schist. There is a lot of green copper oxide and rust.
- (2) Sample no #1 was taken from test hole #11. A choice sample from the test hole.
- (3) Eleven test holes were drilled and the average depth was about 3 ft.
