SUMMARY

In Hushamu Lake area, during the period 18th September to 14th November, 1974, four (4) diamond drill holes were drilled for a total footage of 2,247 feet. Outside of Hushamu Lake area, on Expo No.'s 23, 479 and 487, three (3) drill holes were completed for a total footage of 1,269 feet.

DRILLING REPORT ON THE EXPO GROUPS
15 AND B AND HEP-EXPO GROUPS 6 AND A

- INTRODUCTION -

From 18th September to 14th November, 1974, diamond drilling was done on Expo Groups 15 and B and Hep-Expo Groups 6 and A. The claims upon which diamond drilling was specifically done include Expo No.'s 23, 189, 479 and 487, and Hep No. 59.

Geology and supervision by Utah Mines Ltd. included the following personell: U. Malachowski, F. Gatchalian, Geologists; K. Orleski, D. Fehr, Rene Hackmann, Bruce Broadhurst, Gerry Kroeker, Field Assistants.

Drilling was performed by Connor's Drilling Ltd. The Connors crew consisted of four (4) two (2) man drilling crews, one foreman and one cook.

The above claims are part of a larger block of 847 claims located by Utah Mines Ltd. between 1963 and 1974, along the north side of Holberg Inlet about fifteen to twenty-one miles west and south-west of Port Hardy, near the north end of Vancouver Island.

The Hep-Expo Groups affected by this report cover an area roughly eight (8) miles long by three-quarters (3/4) of a mile wide trending west-northwest in the west central portion of the claim block. The Expo Groups affected cover an area roughly two and one-half (2 1/2) miles square in the northeast corner of the claim block. Within the drill areas, which lie

within the timber licences of Rayonier Logging Company, unlogged areas support mature stands of hemlock, spruce, cedar and balsam. Relief is moderate, ranging from 400 feet to 2,200 feet, but the topography is generally rugged and irregular. The drainage system is highly active, accommodating a high runoff resulting from an approximate 200 inch annual rainfall. Swamps are common and there are some small lakes.

Access to the claims is via the Port Hardy-Holberg road, which leaves the Port Hardy-Port McNeil highway about two (2) miles south of Port Hardy and passes along the south side of Kains and Nahwitti Lakes. Additional access within the claim group is provided by a well developed network of logging roads, most of which belong to Rayonier, and a lesser number to O'Connor Logging Company.

The drill camp was located on Rayonier haul road Branch NE 155, in Expo #242, and was serviced exclusively by road.

DIAMOND DRILLING PROGRAM

Two (2) machines were on the property at all times and were run by four (4) two (2) man crews. Each crew worked a ten (10) hour shift, seven (7) days per week.

A summary of diamond drill holes drilled during the period 18th September to 14th November, 1974 is given below.

<u>HOLE NO.</u>	<u>LOCATED ON CLAIM</u>	<u>ANGLE</u>	<u>BEARING</u>	<u>DEPTH (FEET)</u>
EC 115	Hep # 59	-90°	-----	978' (478)*
EC 116	Hep # 59	-90°	-----	798' (598)*
EC 117	Hep # 59	-90°	-----	558'
EC 118	Hep # 59	-90°	-----	613'
EC 120	Expo # 23	-90°	-----	275'
EC 121	Expo #479	-60°	N 25° E	503'
EC 122	Expo #487	-90°	-----	491'
<u>TOTAL FOOTAGE</u>				3516

* The first figure shown is total depth; the second, in parentheses, is footage drilled during the period September 18th to November 14th.

Diamond drill holes EC-115 to EC-118 are located in the Hushamu Lake area (See Plate 1). Diamond drill holes EC-120, EC-121 and EC-122 are located outside Hushamu Lake area on Expo claim No's 23, 479 and 487 respectively (See Plates 2 and 3). One diamond drill hole, EC-121, located in a logging slash and accessible via O'Connor Branch No. 13 logging road required little site preparation. All other holes were helicopter supported. The helicopter supported holes required the services of a professional faller to clear sites. The sites were kept as small as possible, but large enough to allow

the helicopter to manoeuvre with safety. Generally, sites measured approximately one hundred (100) feet by one hundred and fifty (150) feet. Every site was further prepared by construction of a platform on which the drill machine was placed and anchored.

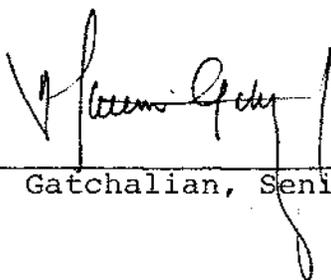

Drilling, generally, encountered fairly good ground conditions, with average core recovery in the 90 to 95+ per cent range. One (1) hole, EC-120, was abandoned before the required depth was reached due to very bad ground conditions (average recovery less than 50 per cent). Core size was dominantly NQ, although BQ and some HQ were also cored.

Core was logged by a Utah geologist, then split in half, with half of the core sent for analyses via Pacific Western Airlines air freight to Chemex Labs Ltd., Vancouver. The remaining half of the split core was placed in storage in the newly constructed core storage and logging facility located on Expo No. 258. Every box of core was labelled with the diamond drill hole number and the footage contained in the box.

Data accompanying the drilling report consists of complete diamond drill logs for diamond drill holes EC-117, EC-118 and EC-120 to EC-122, in Appendix E**, and also diamond drill hole collar location plans (Plates 1 to 3). Statement of qualifications, statement of cost, diamond drilling contractor's invoices, and a copy of the drilling contract are given in Appendices A, B, C and D, respectively.

Diamond drill core logs submitted in Appendix E were done by F. Gatchalian. His signature below is to cover all log sheets comprising Appendix E.

** Complete diamond drill logs for EC-115 and EC-116 have been submitted in an earlier assessment report entitled "Geological, Geophysical, and Drilling Report on the Expo Groups 4, 8, 9, 10, 11, 12, 13 and 14; Hep-Expo Groups 2, 3, 5, 6, 7 and A; and Moe-Expo Group 1 located twenty-one miles west and south-west of Port Hardy, B.C.", dated 22nd November, 1974, and submitted 24th November, 1974.

F. Gatchalian, Senior Geologist

B. Bowen, Geologist

APPENDIX A

STATEMENT OF QUALIFICATIONS

STATEMENT OF QUALIFICATIONS

The field work for this report was done by the following persons whose qualifications are outlined below.

1. U. MALACHOWSKI, Geologist for Utah Mines Ltd., Vancouver, British Columbia.
Completed B.Sc. 1969; employed by Texaco Explorations, Calgary, Alberta, from 1969 to 1970; by Kennco Explorations, Vancouver, British Columbia, from 1970 to 1971; and by Utah Mines Ltd., Vancouver, British Columbia, from 1971 to date as a geologist under the supervision of E.G. Rugg, P. Eng, and M.J. Young, P. Eng.

2. F.R. GATCHALIAN, JR., geologist for Utah Mines Ltd., Vancouver, British Columbia, completed B.A. (geology) at Adamson University, Manilla, P.I., in 1950; employed by Atlas Consolidated Mining and Development Company from April to June, 1956 as student-trainee; employed by American Asiatic Oil Corporation from April, 1959 to March, 1963 in the Phillipine Islands as geologist for oil exploration under the supervision of Foutunato Mamaclay; employed by Samar Mining Company Incorporated from March, 1963 to March, 1964 in the Marara project, Davao, P.I. as project geologist under the supervision of G.M. DuBoulay; employed by Central Engineering Company from March, 1964 to November, 1967 in Manila, P.I. as a geologist under the supervision of Pablo Capistrano; employed by Utah Mines Ltd. from January, 1968 to date as a geologist under E.S. Rugg, P. Eng., and M. J. Young, P. Eng.

3. B. BOWEN, Geologist for Utah Mines Ltd., Vancouver, British Columbia.

Completed B.A. Sc. at the University of British Columbia in 1970; worked as a student during the summer field seasons with Cominco Ltd., in 1967 and 1968, and with Wayland S. Read, Consulting Geologist, Vancouver, British Columbia in 1969; employed as a field geologist, Gibraltar property, May 1970 to October, 1970 by Placer Development Ltd.; employed as a field geologist, Alice Springs, N.T., Australia, from March, 1971 to December, 1971 by Central Pacific Minerals, N.L.; employed as mine geologist, Tungsten, Northwest Territories, Canada from May, 1972 to March, 1974 by Canada Tungsten Mining Corporation; employed by Utah Mines Ltd., from March, 1974 to date as a geologist under the supervision of M.J. Young, P. Eng.

DIAMOND DRILLING CONTRACT

A handwritten signature or scribble in the bottom right corner of the page, consisting of several loops and a long tail.

DRILLING AGREEMENT

THIS AGREEMENT, entered into this 24th day of
MAY, 19 74 by and between

UTAH MINES LTD., a
corporation, hereinafter referred to as "Owner", and
CONNORS DRILLING LTD.,
155 WEST 3RD AVENUE,
VANCOUVER, B.C., V5Y 1E8

hereinafter referred to as "Contractor",

WITNESSETH:

WHEREAS, Owner desires to have Contractor carry out
a drilling program on certain lands controlled by Owner and
located in

; and

WHEREAS, Contractor is desirous of performing such
drilling program for Owner and is fully equipped and capable to
perform such work;

NOW THEREFORE, in consideration of the covenants and
conditions hereinafter set forth, Owner and Contractor mutually
agree as follows:

1. WORK TO BE PERFORMED: Contractor agrees to perform
fully and completely all drilling and/or coring work requested
by Owner to be done by Contractor on the abovementioned lands,
such performance by Contractor to be in strict conformance with
the terms and provisions of this agreement and specifically in
conformance with those provisions set forth on Schedule I
attached hereto and by this reference incorporated herein.

All work to be performed by Contractor hereunder
shall be done at such times, such locations and in such manner
as requested by Owner, subject, however, to the specific provisions
set forth in Schedule I hereto.

701007

It is understood that Owner may employ other contractors to perform work, including drilling, upon the subject property and Contractor shall conduct its operations so as to best cooperate with such other contractors, if so requested by Owner.

2. WORKMEN AND EQUIPMENT: Contractor agrees to furnish and maintain in first class operating condition the equipment, machinery, tools, and supplies specified in Schedule I hereto, or necessary to perform the work as set forth in said Schedule I hereto, and all labor, including superintendence, and all other things whatsoever required or convenient to properly perform the work specified in this agreement and within the time herein required. Owner may require Contractor to discharge from the performance of this contract any employee deemed to be in any way objectionable by Owner. No equipment furnished by Contractor hereunder for use in the performance of this agreement shall, without the prior consent of Owner, be removed from the site of the work until such time as the performance of this contract shall be completed by Contractor.

3. COMMENCEMENT AND PROGRESS OF WORK: Unless otherwise specified in Schedule I herein, Contractor shall, within TEN days after being notified by Owner to start work, commence work in the field at such locations as Owner may designate and shall thereafter continue diligently in the performance of the work at such rate of progress and at such locations as may be required by Owner and shall fully complete said work to the satisfaction of Owner.

4. NO REPRESENTATIONS TO CONTRACTOR: It is understood that Contractor has satisfied itself as to the nature and location of the work, the character of the soil, rock, or other materials to be encountered, the character, kind and quantity of equipment needed for the prosecution of the work, and the conditions under which the work is to be performed and Owner has made no

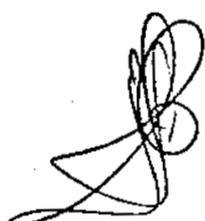

representations to Contractor concerning the conditions to be encountered in the performance of the work. No verbal agreement or statement shall affect or modify any of the terms or provisions of this contract and no change, amendment, or modification of the terms or conditions of this contract shall be valid unless reduced to writing and signed by Owner and Contractor.

5. LIENS AND CLAIMS: Contractor shall discharge at once all liens, claims, stop notices, or attachments which may be filed or levied in connection with the work done by Contractor under this agreement and shall pay all taxes levied upon Contractor, its employees, equipment, property, or operations and Contractor shall hold Owner, Owner's property, and the lands upon which the work called for in this contract is being performed harmless therefrom. Contractor shall pay promptly and in full the claims of all persons, firms, or corporations performing labor upon or furnishing equipment, materials, supplies, or power used in the performance of or contributing to the work described in this agreement.

Upon completion of work under this agreement, Contractor, if required by Owner, shall deliver to the Owner a complete release of all claims for taxes, liens, claims, stop notices, or attachments arising out of this agreement or receipts in full in lieu thereof and if required in either case, an affidavit that, to Contractor's knowledge, such releases or receipts include all labor and material for which a lien, claim, stop notice, or attachment could be filed.

6. LIABILITY FOR INJURIES AND PROPERTY DAMAGE: Contractor shall save harmless Owner, Owner's property, and the lands upon which the work called for in this agreement is being performed from all liability for injury to or death of persons and for damage to property in any way arising out of Contractor's performance under this agreement.

7. PATENT RIGHTS: Contractor shall save harmless Owner, Owner's property, and the lands upon which the work called for in this agreement is being performed from any claim, damage or expense arising out of any action or proceeding for the infringement or alleged infringement of any patent arising out of Contractor's performance under this agreement.

8. PAYMENT: In consideration of the covenants of the Contractor herein set forth and the full and prompt performance of this agreement by Contractor, Owner agrees to pay to Contractor and Contractor agrees to receive and accept as full compensation for Contractor's performance of this agreement, and also for any loss or damage to Contractor arising out of this agreement or from action of the elements or from unforeseen difficulties or obstructions which may be encountered in the performance of the contract, and for all risks of every description to Contractor in connection with the work, those sums set forth in Schedule II attached hereto and by this reference incorporated herein.

An estimate will be made by Owner once each calendar month during the term of this agreement of the amount of work completed by Contractor during the preceding calendar month and Owner will, on or before the last day of each calendar month, pay to Contractor the amounts due under the terms of Schedule II hereto for such work completed by Contractor during said preceding month. The estimates and calculations made by Owner as to the amount of work done by Contractor hereunder shall be final and binding upon Contractor and shall conclusively establish the amount of work done by Contractor hereunder.

9. BOND: Contractor shall furnish a surety bond in form satisfactory to Owner, with a surety approved by Owner, in the amount of NOT APPLICABLE (\$)
guaranteeing the faithful performance of this agreement by Contractor and the payment by Contractor of the claims of all persons, firms or corporations performing labor upon or furnishing materials, equipment, supplies or power used in the performance

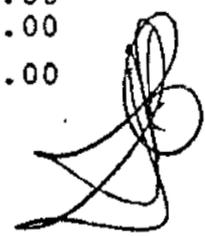

of this agreement.

No work shall be commenced under this contract until the required bond is produced and submitted to Owner. Should any surety upon the said bond become unacceptable to Owner for any reason at any time, Contractor will promptly furnish such additional surety, sureties, or security as Owner may request.

10. TERM OF CONTRACT: Unless the provisions of Schedule I shall specify a different length of time during which Contractor shall be bound to perform under the terms of this agreement, Contractor shall be obligated to perform for Owner under the provisions of this contract upon the lands hereinabove described, all drilling work requested by Owner to be performed by Contractor during a period of one (1) year from and after the date of this agreement, provided, however, that Owner may, at any time after the completion of the minimum amount of drilling work guaranteed to Contractor under the provisions set forth in Schedule I, terminate this agreement by giving notice of such termination to Contractor.

11. INSURANCE: Contractor shall obtain and carry during the period of this agreement at Contractor's sole cost the following insurance coverage:

<u>Insurance Coverage</u>	<u>Minimum Limits</u>	
Bodily Injury Liability including Contractual Liability and Completed Operations	Each person	\$100,000.00
	Each occurrence	\$300,000.00
Property Damage Liability including Contractual and Completed Operations	Each occurrence	\$100,000.00
	Aggregate	\$100,000.00
Automobile: (Including owned and non-owned automobiles)		
Bodily Injury	Each person	\$100,000.00
	Each occurrence	\$300,000.00
Property Damage	Each accident	\$100,000.00

Workmen's Compensation
and Employer's
Liability

Full Statutory Compliance
Each person \$100,000.00
Each accident \$300,000.00

No work under this contract shall be started until certificates of insurance conforming with the above minimum requirements are obtained and submitted to the Owner. Insurance companies must be satisfactory to Owner, and policies must provide that ten (10) days' written notice be given to Owner prior to cancellation or annulment.

12. COMPLIANCE WITH THE LAW: Contractor and its employees shall at all times observe and comply with all statutes, ordinances, and regulations of any nation, state, province, municipality or other governmental authority or agency having jurisdiction over the place where the work hereunder is being carried on.

13. PERMITS: Contractor shall obtain all permits and licences necessary for the performance of this contract and shall give all necessary notices and pay all fees required by governmental agencies or by other authorities in connection with the performance of this contract.

14. SUPERINTENDENT: The Contractor shall have a competent superintendent, satisfactory to Owner, on the work at all times with authority to act for Contractor. The superintendent shall not be changed except with the consent of Owner unless the superintendent ceases to be in the employ of the Contractor.

15. CONTRACTOR NOT AGENT OF OWNER: In the execution of the work to be performed hereunder, Contractor shall operate as an independent contractor and not as an agent or employee of Owner. Contractor shall hold Owner harmless from any liability which may arise by reason of any action or representation of Contractor, its agents, or employees.

16. NOTICE AND PLACE OF PAYMENT: All notices to be given to Owner by Contractor hereunder shall be delivered to

Owner's office at 510 West Hastings Street, Vancouver, B. C.

Any notice to be given by Owner to Contractor hereunder may be given by delivering such notice personally to Contractor's superintendent at the job site or, at Owner's option, such notice may be given by depositing said notice in any United States post office in an envelope, postage prepaid, and addressed to Contractor at 155 West 3rd Avenue, Vancouver, B. C. V5Y 1E8.

Such notice to Contractor shall be deemed to have been given either upon its delivery to Contractor's superintendent or by deposit in said post office as the case may be.

All moneys payable to Contractor hereunder shall be payable at Owner's office in Vancouver, B. C.

or at Owner's option may be mailed to Contractor in the manner hereinabove prescribed for the giving of notice to Contractor.

17. ASSIGNMENT: Contractor will not, without the previous written consent of Owner, assign this agreement nor subcontract any part or portion of the work to be performed hereunder to any other party.

18. PROTECTION OF INFORMATION: No information whatsoever regarding the conduct, records, or results of any work performed by Contractor under this agreement shall be given or discussed by Contractor or any of Contractor's agents or employees in any manner to or with any party other than the Owner without the prior written consent of Owner.

19. SUCCESSORS: This agreement and each and every provision hereof shall inure to the benefit of and be binding upon the parties hereto and their successors and assigns.

IN WITNESS WHEREOF, the parties hereto have executed this agreement as of the date hereinabove set forth.

SCHEDULE I
WORK PROVISIONS

1. The Contractor will provide equipment, supplies, and crews to operate ^{two} ~~one~~ drilling rigs two (2) shifts per day, including, but not limited to all necessary drilling machinery, bits, associated tools, motor fuels and oils, repair parts, casing rods, core barrels, drilling muds, cement, and all necessary labor and supervision. Contractor shall, at the commencement of work hereunder, at its own expense, transport all such equipment, supplies and personnel to the job site.
2. Holes will be drilled stand BQ, NQ, or HQ wireline. In all instances, reasonable care shall be exercised to obtain the recovery of as high a percentage of core as the formation being drilled will reasonably permit. All such core shall be properly identified in correct order and placed in core boxes provided by Owner. Contractor shall furnish a log of each hole drilled, showing location and depth drilled and/or a daily record sheet with holes drilled and footage noted. Said record is to be signed by the driller and will be used in computing payment for work done.
3. The location, depth, and angle of each hole to be drilled by Contractor shall be specified by the Owner. Holes shall have a minimum depth of 150 feet and a maximum depth of 1,200 feet. Notwithstanding any other provision of this agreement, Owner guarantees that a minimum of 5,000 lineal feet of drilling will be required of Contractor under this agreement.
4. The Owner shall check the angle and direction of each hole in order to assure that the hole is being started at the required angle and in the required direction. The Contractor assumes no responsibility for any deviation that may occur in a hole beyond the collar. The measurement of all holes shall be taken from the top of casing, or standpipe, as the case may be, which shall be kept as close to the original contour of the ground as circumstances will permit.
5. Should cavities or loose and caving materials, or other adverse conditions be encountered, so that in the opinion of the Owner and Contractor, further drilling in a hole is not practical, the hole may be abandoned, and the Contractor shall be paid at the rates specified in Schedule II attached hereto for the footage actually drilled, provided, however, that the Contractor shall not be paid when said adverse conditions are a direct result of negligence on the part of the Contractor. The Contractor, at the request of the Owner, will replace any driller not achieving satisfactory core recovery.

6. The Contractor shall provide board and lodging for all Contractor's personnel and two (2) to four (4) of the Company's personnel. The Company shall pay the Contractor at the rate of \$3.00 per meal for its personnel.

7. The Contractor will, at its own expense, provide transportation for Contractor's equipment, personnel, and supplies to and from the drill sites and any camp established by Contractor.

8. The Owner shall provide, at its own expense, all rights of way that may be required to enable Contractor to move to and from, and to operate on, the drill sites specified by Owner. Contractor shall be permitted to fell and cut such timber as may be required in the course of the work hereunder upon the property controlled by Owner, provided, however, that Contractor shall comply with all the terms of Owner's permits allowing such timber cutting. Owner shall save the Contractor harmless from any assessments for stumpage.

9. This agreement and any disputes arising hereunder shall be interpreted and determined in accordance with the laws of the province of British Columbia.

10. During the course of the work, the Contractor agrees at all times, to keep operations free from accumulation of waste material, rubbish and garbage, and upon completion of the work, shall remove all tools, scaffoldings, surplus materials and rubbish, and leave premises in a clean condition. The Contractor shall observe and comply with all applicable Federal and Provincial laws, regulations and orders relating to prevention of forest fires and sanitation.

SCHEDULE II
PAYMENT SCHEDULE

The owner shall pay the Contractor in Canadian Funds for work completed according to the following schedule:

1. Surface Drilling

The price per foot for core drilling in bedrock, from the surface shall be as follows:

	<u>HQ</u>	<u>HQ</u>	<u>BO</u>
0 - 500 feet	\$17.45	\$13.75	\$12.50 per foot
500 - 1,000 feet	\$20.74	\$15.15	\$13.75 per foot
1,000 - 1,500 feet	\$24.68	\$18.20	\$15.80 per foot

2. Overburden drilling

0 - 100 feet	\$12.50 a foot.
100 - 250 feet	\$15.00 a foot.

Beyond 250 feet, at Field Cost, if the cost of penetration is greater than \$15.00 a foot.

3. Field Cost Defined

"Field Cost" is defined for the purpose of this Agreement as all direct labor, including supervision, at \$11.00 a man hour, drill and equipment (support) rental at \$9.00 per drill rig hour, and the cost of pipe or casing lost, and materials and supplies consumed in the work.

4. Casing, Reaming, Cementing and Mud Circulation operations, in overburden or bedrock, if and when required, shall be at Field Cost.

5. Pipe or Casing Left in Holes

Any Casing, Casing Shoe bits, or pipe left in holes at Owner's request, shall be paid for by owner at the Contractor's Cost, F.O.B. the drill site.

6. Surveying Holes

Any Clinometer survey required by Owner, shall be paid by Owner at a rate equal to the cost of three feet of drilling at the depth where tested.

7. Sludge Samples

The Contractor shall at the Owner's request, collect sludge samples when possible at no cost to Owner. Containers for such samples shall be provided by Owner at no cost to Contractor.

8. Standby Time

Standby time at request of Owner, shall be paid at Field Cost.

9. Travel Time

Should the travel time between drill camp and drill sites exceed one half hour per man, per day, the Company agrees to re-imburse the Contractor for all the travel time at the rate of \$10.00 a man hour.

10. Water

If the source of water supply is a distance greater than 1,500 feet from the drilling site or a vertical lift of over 300 feet, owner shall pay Contractor's actual cost for transporting water in excess of 1,500 feet distance or over lifts in excess of 300 feet.

11. Moving

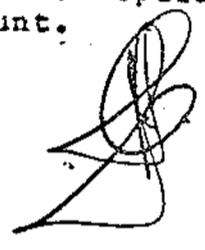

The first 16 man hours incurred in moving between drill sites shall be for the Contractor's Account. Any additional time incurred in moves between drill sites would be for the Company's Account at Field Cost.

12. Mobilization and Demobilization

Contractor, shall at the commencement of operations under this Contract, transport all of its equipment, supplies, and personnel to the truck discharge point, and upon completion of the work under this Contract shall transport all of its equipment, supplies, and personnel from the truck loading point to such other destination as Contractor may choose, for two drilling outfits, associated equipment, operating personnel, a total sum of \$5,000.00.

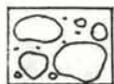

13. Tractor Rental

The Contractor agrees to provide a tractor to assist in moving and servicing operations at a monthly rental of \$1,600.00. Operator's time at Field Cost Labor Rates, for the Company's Account.

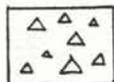

APPENDIX E

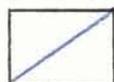

Explanation of symbols used in graphic log (geology) column of the diamond drill log.

Overburden

Fragments

Shears, faults

Quartz vein, veinlet

Sulphides- massive, veinlets, and disseminated Pyrite, if nothing written by graphic log; chalcopyrite always stated.

Magnetite- veinlets, and disseminated. Occasionally specular hematite, but latter always stated.

Zeolite veinlet

Gypsum veinlet

Calcite veinlet

NOTE: Sample Interval column refers to sample number for assay purposes.

Zeolite v.lets, some Co₂

hi-graphitic gouge.

Blk. frags. inclusion. * 123'-127.5' Lt. grey section non-limy aphanitic ANDESITE?
Contains py. v.lets (hairlike), no obvious lamination and aphanitic texture; sparse Co₂ snc. & Zeolite. An 1" inclusion in the aphanitic rock may indicate forcefull dyke.

1.5" v.let. hi. obl. & stanny. (dikelet)

1cm. Calcite v. & v.lets. at 130'-139' Co₂ vns ~ 5 v.lets / foot
v/size 1mm-1cm.

dip 20° from Hor.
70° from C.A. in
blk sh. & 1cm lat. band.

Brownish & grey (hi. lime)
laminations, occasionally
followed by py. ~ 25°-40° dip.

1" brown siltstone ~ 50° dip.
w/py. (local)

3mm. brownish siltstone.
5° dip. contains py.

1" slip, hi-graphitic shale.

lamination of black shale & lat.
dips ~ 5-10° from Hor. of core
± 20°-25° true dip

siltstone strata ~ 1cm. thick
5° flat dip w/ the horizontal.
some Calcite w/in. ± 1/foot bands.

Band siltstone. 7° dip.

DESCRIPTIVE GEOLOGY

26'-219.5' HI-CALCAREOUS DARK GRAY TO BLACK GRAPHITIC SHALE & BROWNISH SILTSTONE!

* 123'-127.5' Lt. grey section non-limy aphanitic ANDESITE?
Contains py. v.lets (hairlike), no obvious lamination and aphanitic texture; sparse Co₂ snc. & Zeolite. An 1" inclusion in the aphanitic rock may indicate forcefull dyke.

The contact of dyke is discordant to bedding so it is not a sill. A v.let of py. & pyr. at etc.

154'-219': Banding less frequent than above section, about 1 per foot / or xil per foot. size < 1cm. thick ---
