CARMi MOLYBDENUM PROPERTY
PERCUSSION DRILLING MAY - JUNE 1975

The Granby Mining Corporation carried out a percussion drilling program on the property between 20 May and 6 June 1975. The program consisted of 11 holes totalling 3350'. Since assessment credit is required only for certain claims, only a part of the program is submitted for assessment. Costs that can be assigned directly to a particular hole are so assigned, other costs are pro-rated on a drilled footage basis. Assessment credit is claimed for the following holes:

| <u>Hole No.</u> | <u>Total Depth</u> | <u>Overburden Depth</u> | <u>Claim</u> | <u>Group</u> |
|-----------------|--------------------|-------------------------|--------------|--------------|
| P 44 | 350' | 7' | LANG 2 Fr | TOR |
| P 45 | 300' | 10' | LANG 2 Fr | TOR |
| M 1 | 300' | 23' | IVY-0 9 | MULLINS HILL |
| M 2 | 300' | 16' | IVY-0 9 | MULLINS HILL |

These holes are all vertical. Their locations are shown on accompanying plans and distribution of values is shown on accompanying copies of assay certificates.
