MINERAL RESOURCES BRANCH

ASSESSMENT REPORT

NO. 6099

WORK COMPLETED 1976 CONSISTED OF ESTABLISHING EXACT LOCATION OF CLAIMS ON GROUND.

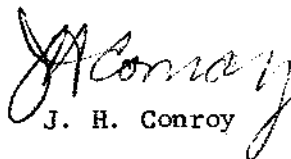

- Selecting a potential area from preliminary prospecting and review of previous work.
- Layout of a grid on 100' intervals over the selected area.
- Soil sampling this grid system.
- Intense visual examination of the entire grid area and adjoining ground.
- Cleanup and removal of debris from known outcrops (old shavings).
- Removal of exposed rock in old shavings by gas, rock drill and blasting, thereby obtaining fresh unexposed samples.
- Access to area was by helicopter and egress was by foot.

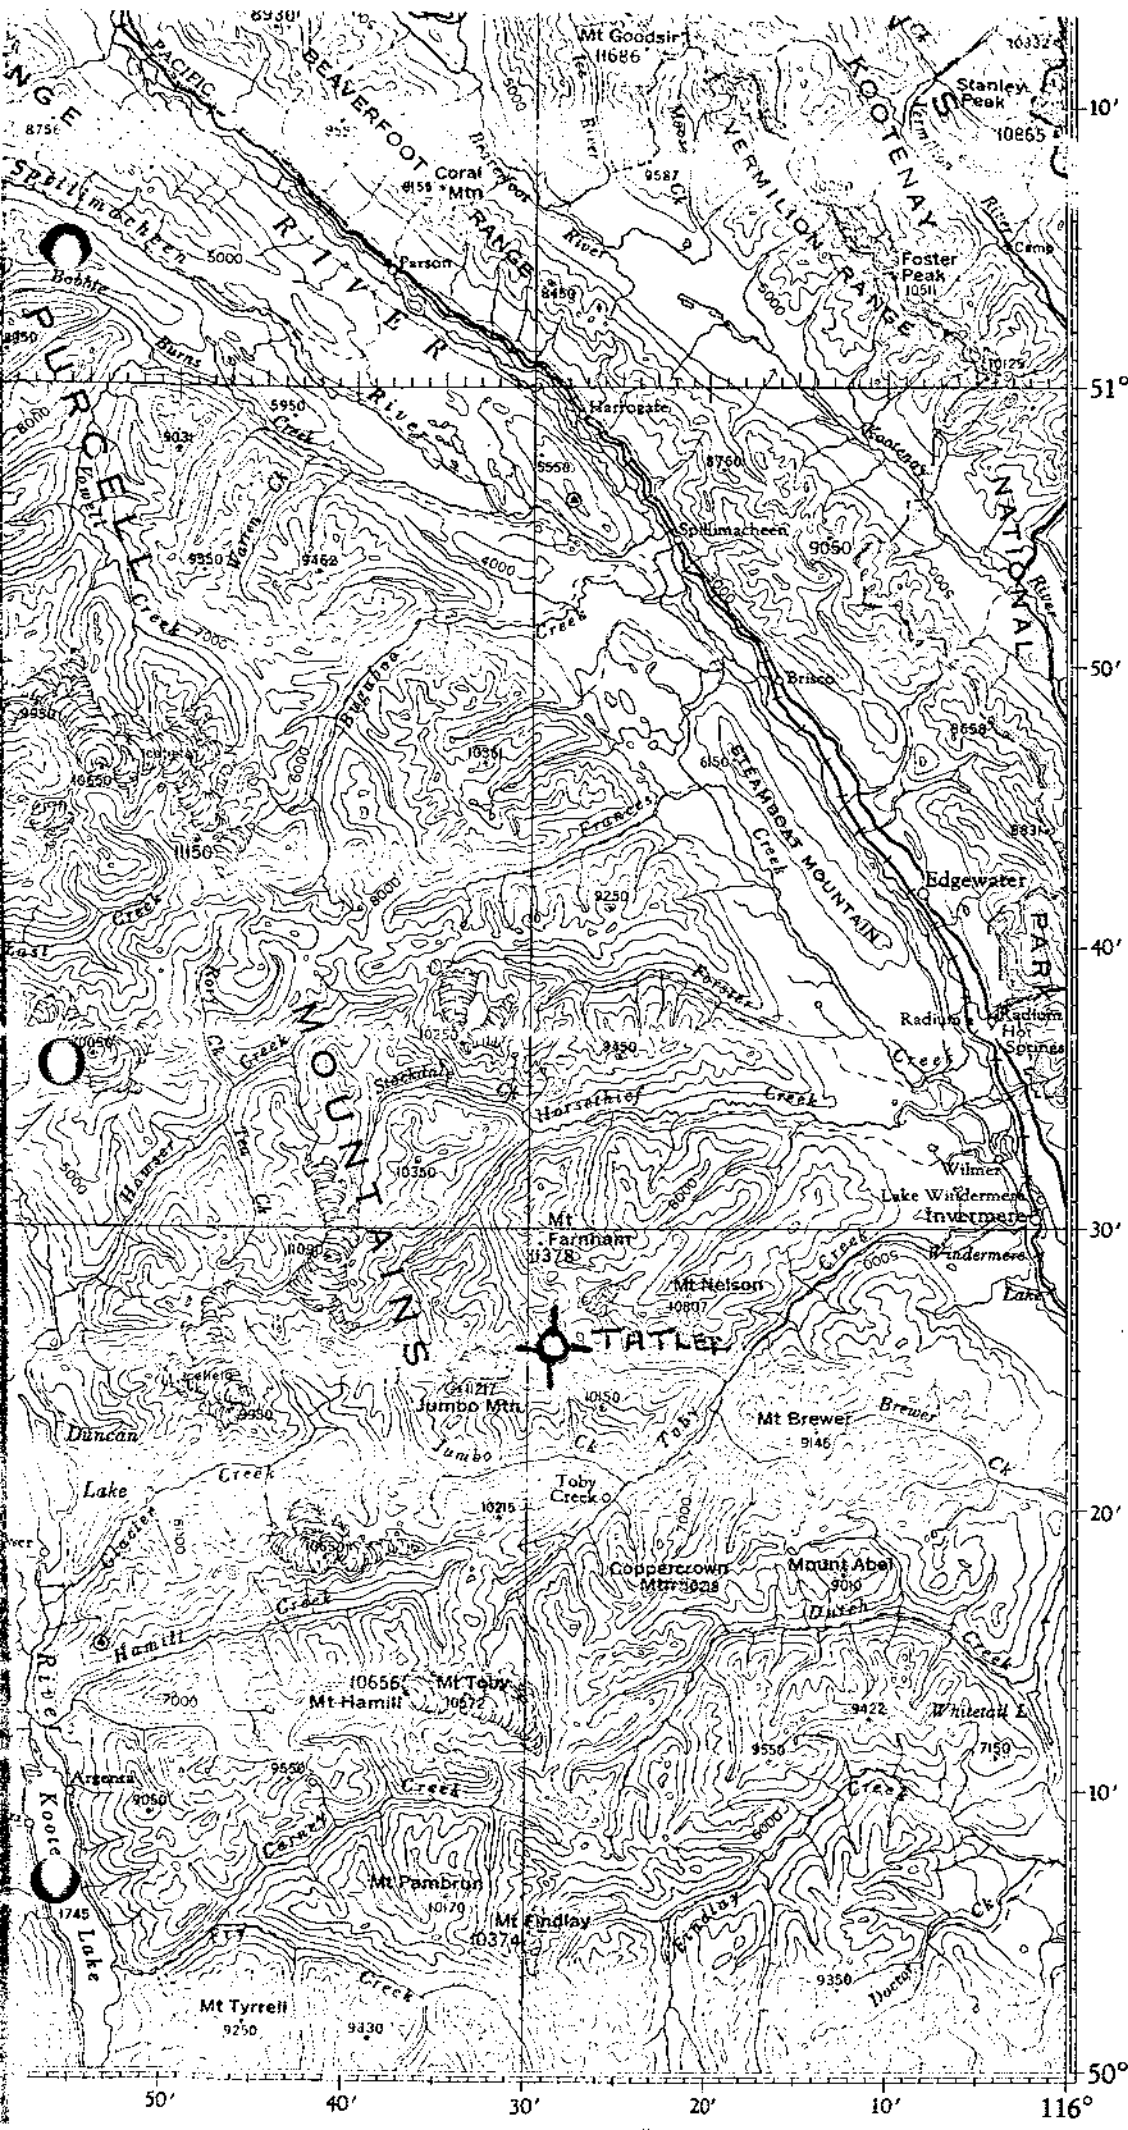

Total cost of this work was \$ 2,718.39. There has been no charge made by J. S Carter for preparing maps of soil sample results, as this was done as a personal favour to Mr. Ken Kane.

Therefore I have divided the work into two categories:

A Physical - 40%	or	\$ 1,087.00
D Geophysical) - 60%		1,631.00
Geochemical)		

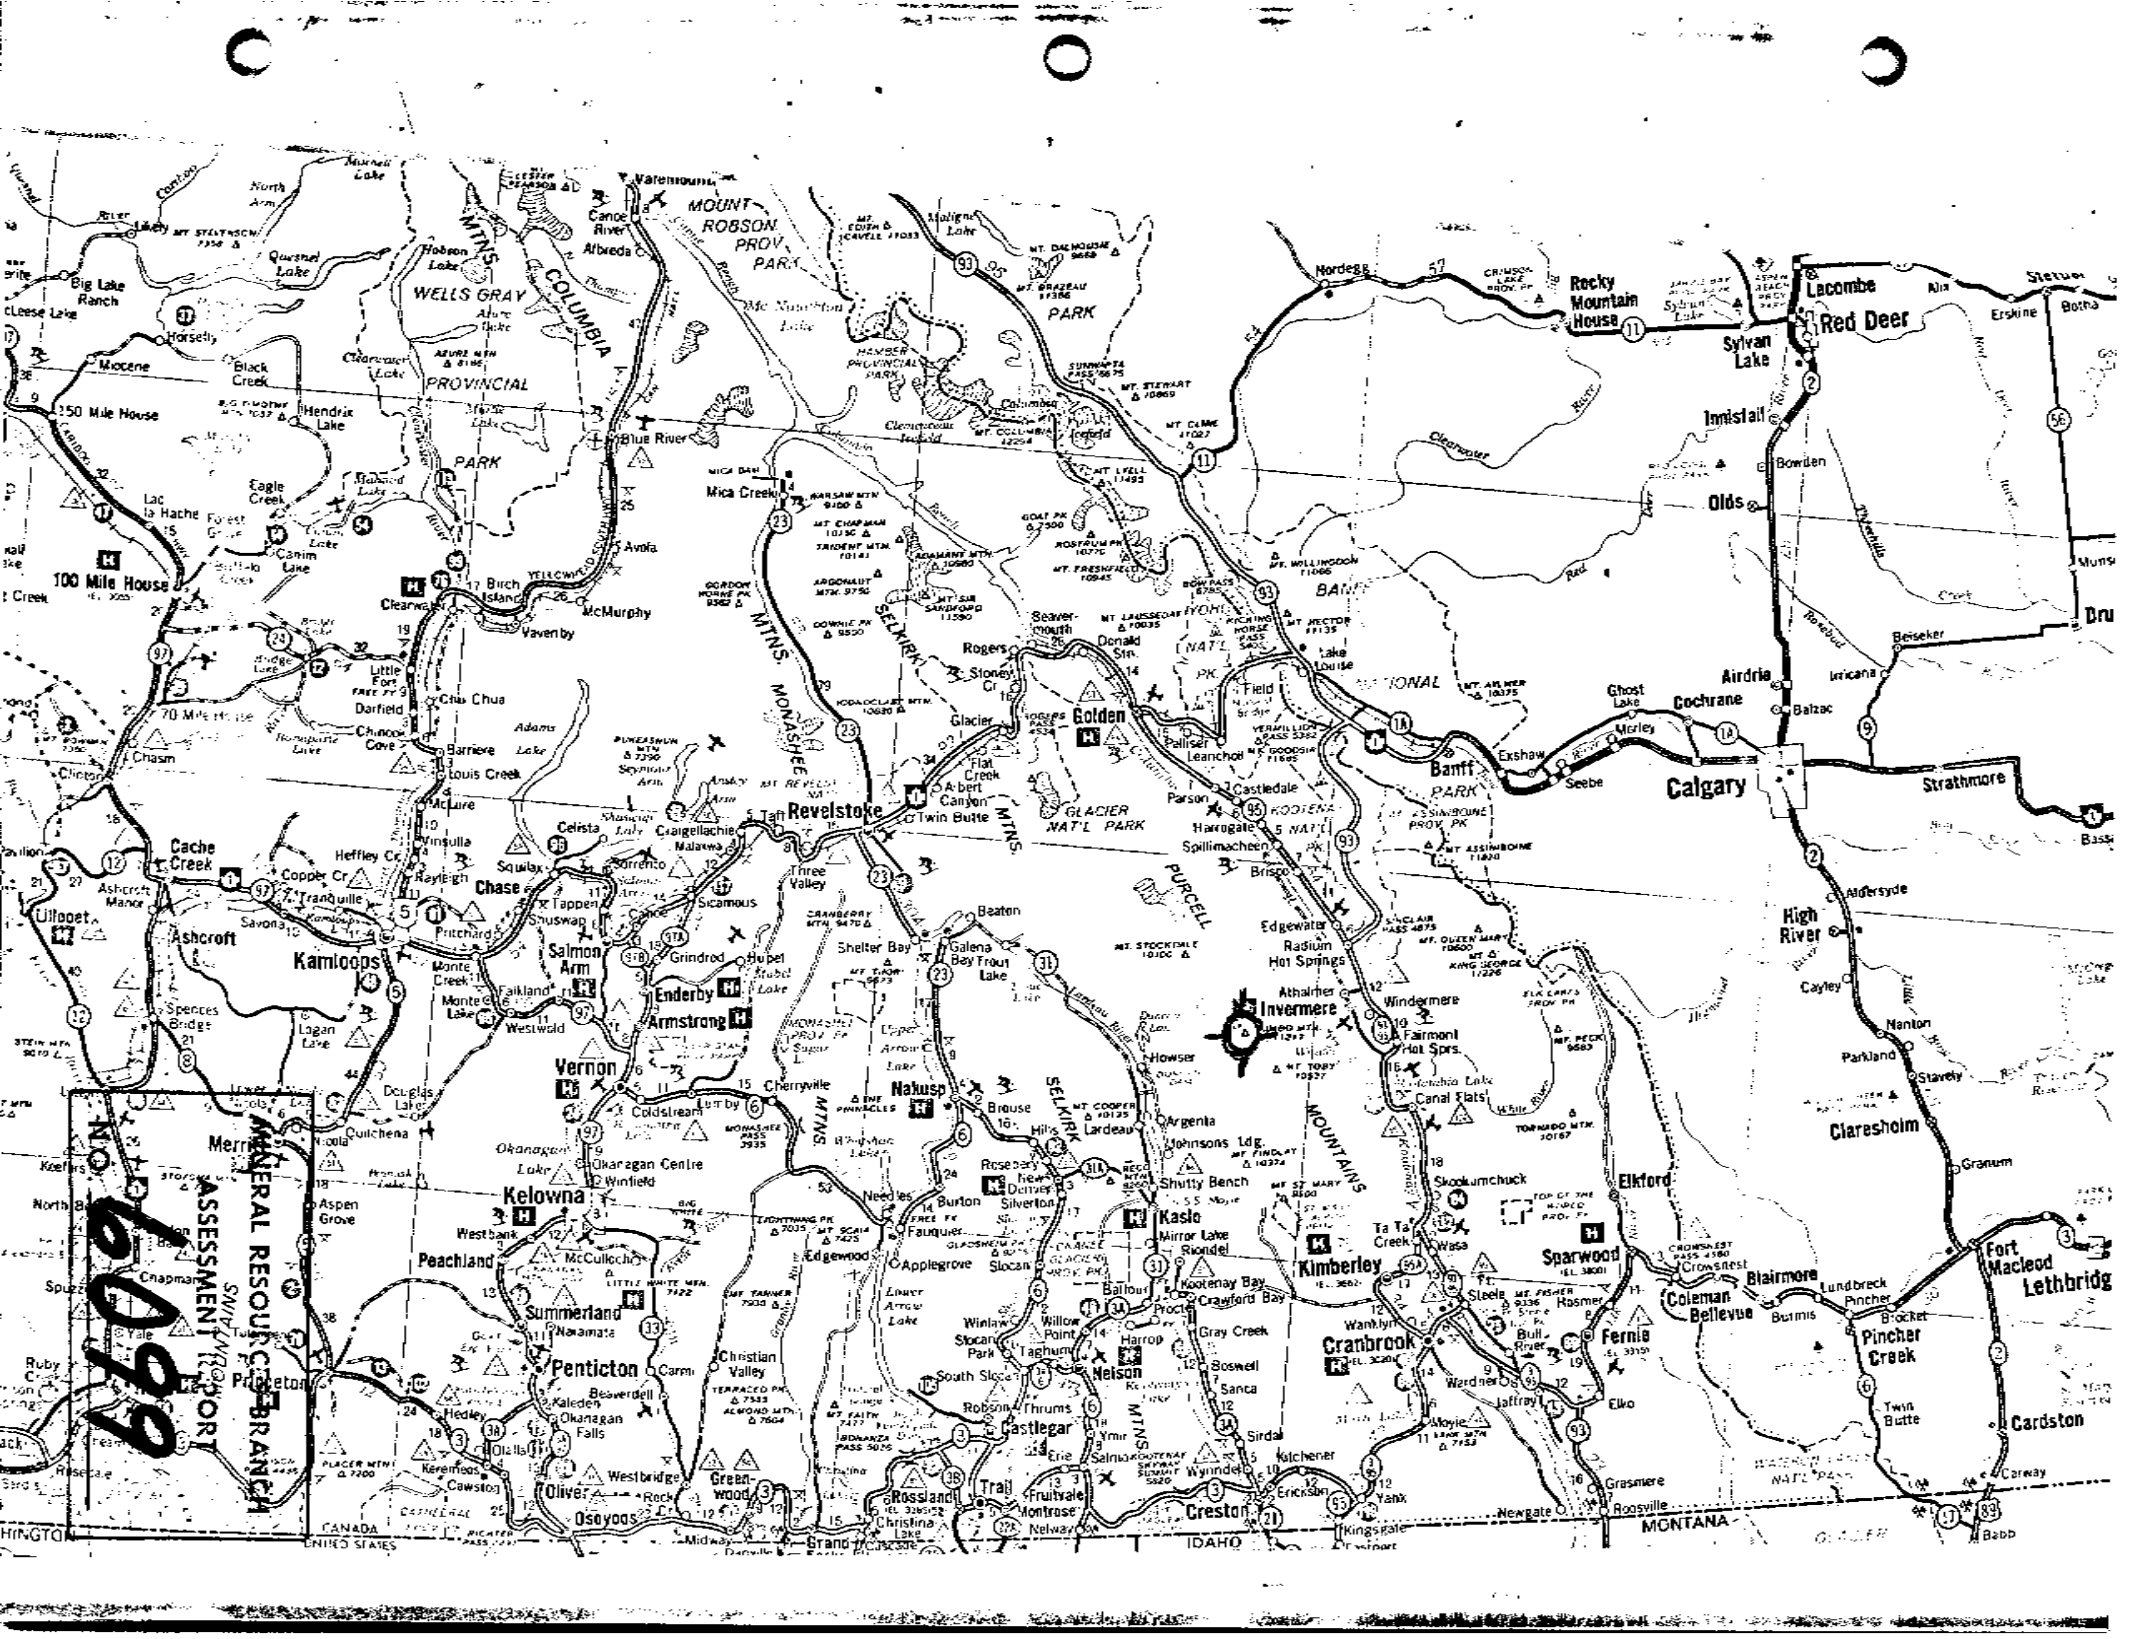

and applied for work credit accordingly.
