

6165

The accompanying map illustrates a geochemical survey carried out on the Pine Valley group of claims located 1½ miles north of Peterhope Lake in the Nicola Mining Division.

The claims are owned by Pine Valley Explorers Ltd. N.P.L. of Box 441 Merritt, B.C. VOK 2B0.

The claims covered are PV # 1 (2 units) and PV # 2 (16 units) surrounding Mineral Leases M19R and M20R, Record No.s 51 and 52, anniversary date December 29, 1977.

The original line cutting and sampling was carried out in 1973 when 285 samples were analysed for lead, silver and mercury to provide reconnaissance coverage of the area of interest. This program was described in an assessment report by A.F. Reeve, P.Eng. dated June 1973. Approximately 1200 samples not analysed at that time were stored on the property until December 1976, when they were shipped to Bondar Clegg & Co. of North Vancouver for analysis as part of a continuing exploration program being undertaken by Pine Valley Explorers.

Since the results of these analyses will be the subject of evaluation by our consulting engineers, Cordilleran Engineering Ltd., no comment will be made on the results of this survey other than to observe that other than the apparent anomaly disclosed on Lines 3 and 6 south at 14 east, most of the other indications occur near occurrences found by the old time prospectors.

Copies of invoices relating to these analyses are included herewith.

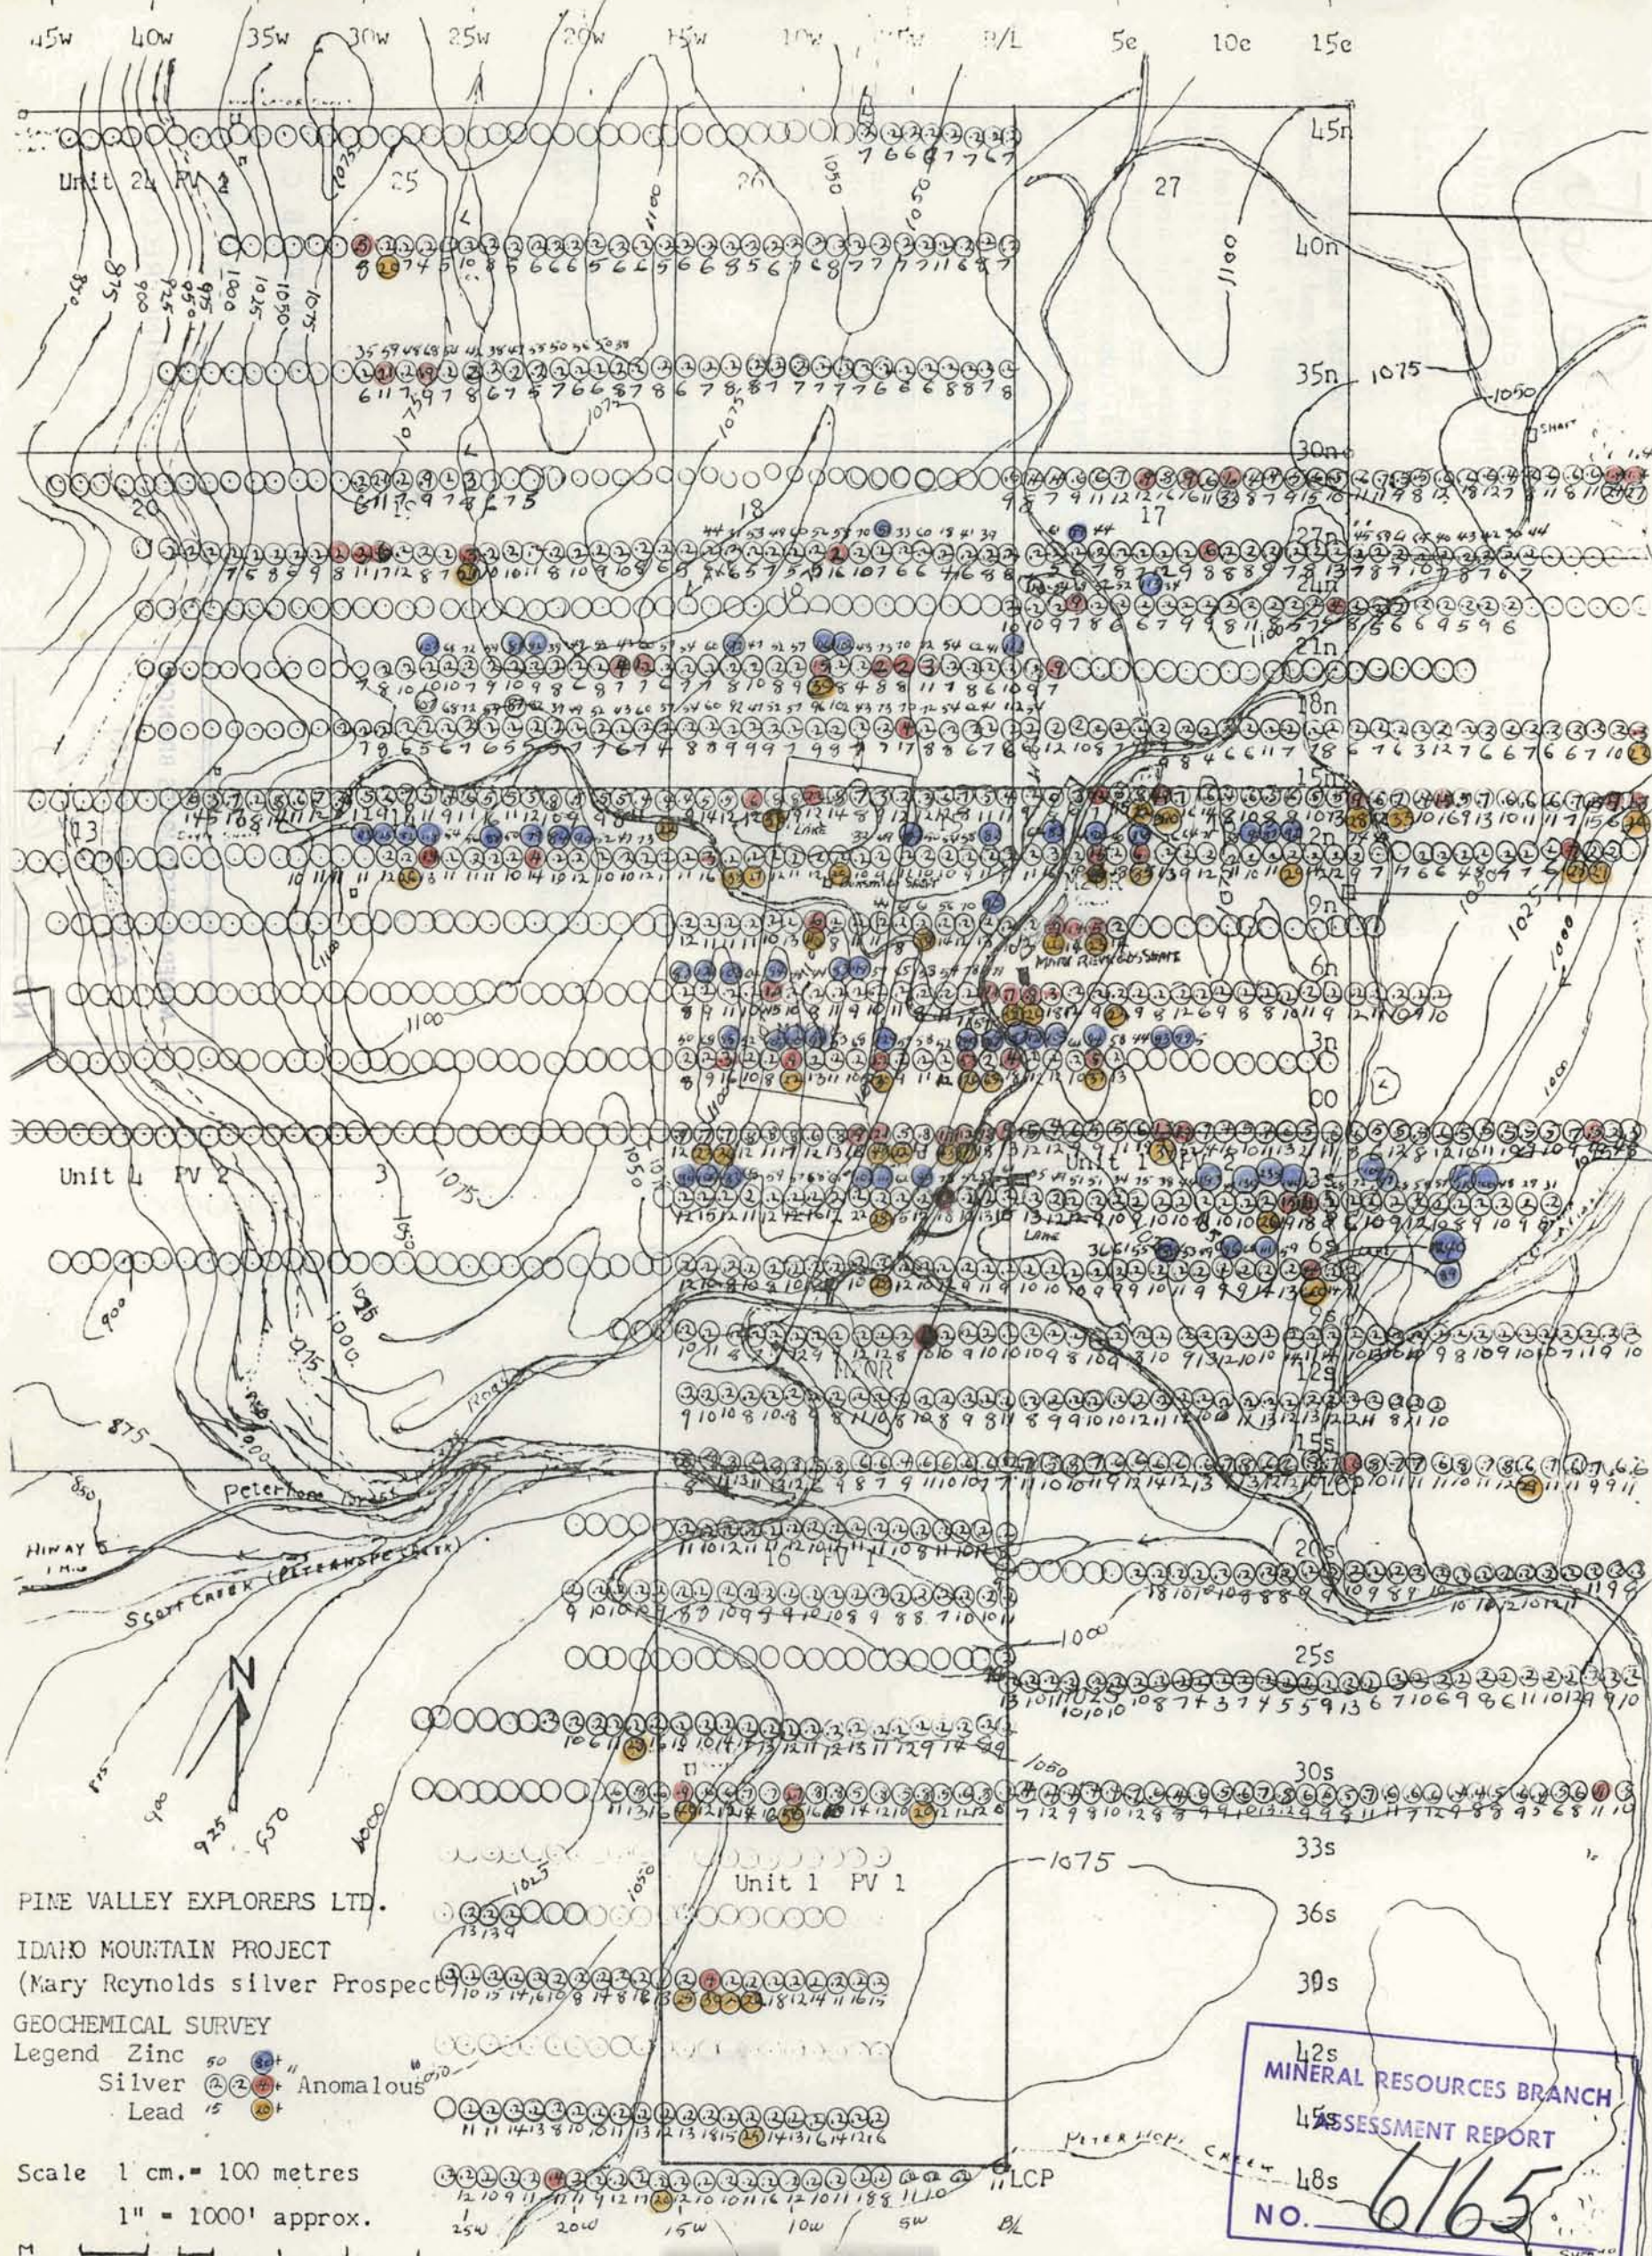

Map and accompanying data was compiled by Don Faulkner, President and General Manager, Pine Valley Explorers Ltd. January, 1977.
