

We Robert Beaupre, 4361 Shelbourne Street, Victoria, 1977 Free Miner's License 155486 (B.C. Government Prospecting Course passed March 18, 1976) and Alex Low c/- 4361 Shelbourne Street, Victoria, 1977 Free Miner's License 93142 did singly and jointly attend to staking and prospecting the following Mining Properties:

Blaze # 1	Recorded June 21, 1976	Receipt # 113616E
Blaze # 2	Recorded July 12, 1976	Receipt # 113636E

Victoria Mining Division

We did prospect the above by trenching (surface drilling and blasting for samples and rock types) observing and geo chemical testing. More than 10 metres of blasting was done. Hours put in were:

Between	June	21 to 30	57 hours
	July	1 to 19	31 hours
	August	8 to 28	24 hours
	September	6 to 18	20 hours
	October	2 to 24	15 hours
	November	6 to 20	17 hours
	Total		164 hours at \$10.00 per hour \$1640.00

Cost of transportation being use of a Chevelle Blazer and A Dune Buggy, Gas, Oil, Repairs	\$ 795.54
Atlas Copco Drill rentals and powder	\$ 95.98
Camp Equipment/ Food	\$ 315.19
Cost Assays / Geo Chemical Reports	\$1147.46
Costs Maps for reports and Assessment Report	
* See sketch attached	
TOTAL	\$2994.17

The Field Work was done in Metamorphic Rocks, a Garnet, Biotite, Quartz, Feldspar, Schist which would appear to be in contact with Gneiss. Some small Diorite veins were noted and severe folding and faulting was observed. One Quartz vein had some free Gold but did not appear to continue when a depth of one metre was blasted out. See detailed minerals noted from Assays and Spectrographs Reports attached. One float sample showed good Silver reading and appeared to be of local origin.

Gold was read as being above background levels at several locations and may correspond to the type of deposits described from some Australian deposits, as indicated by the sedimentary rock formation observed in the area.
