SUMMARY

Summary:

A Geo-Chem work program was undertaken to outline any areas of interest in the Bobbi Group of claims situated between Stewart Creek and the Village of Ymir, B.C. Two areas gave a MO Geo-Chem anomaly. The areas of interest outlined in the program are roughly (190 x 220 meters). Geological mapping and further testing of the anomalous areas is warranted.

Introduction:

The principal mineralized showing is located about 1700 M north of the Ymir exit to Ymir-Nelson Highway and 1370 M west. Access is by Helicopter.

Property:

The property consists of 8 units, 13 claims and 1 fractional.

Bobbi - 6 units. *MURIEL 4 CLAIMS.*
Mary - 2 units.
Kim - 6 claims.
Betty - 3 claims.
Fractional - 1 claim.

held under option since December 1, 1978, by Asamera Oil Corporation,
1500 - 335 - 8th. Ave. SW.
Calgary, Alberta T2P 1C9.

Latitude 49 18' Longitude 117 14' Nelson, B.C. NTS RY 82F/6w.
(Map shown on page 4)

History:

The property is situated in an area that has had work done on several claims in the early 1900's, but outside of several small workings presumably for Gold or Silver, there is no visible sign of work having been done on the MO outcrop.

Physiography:

The position of the outcrop is at 4200' elevation, on a knoll facing southeast and close to 40% of it is bare of soil with the exception of a matting of moss and roots and in some places a few inches of soil. The outcrop area is dry and there is no water seepage near the showing. The whole area has been burned over leaving many tall charred cedar trees and the second growth of Balsam, Cedar, Alder, etc, is very thick.

Scope:

The purpose of the 1979 field program was to provide a preliminary evaluation of the property, and a systematic Geo-Chem soil and rock sampling program was carried out. Line cutting and sampling were done by the contracting crew.

GEO-CHEMISTRY

Geo-Chemistry:

A grid was established and lines were spaced 60 M apart and soils were collected at 30 M intervals. Rock samples were taken in outcrop areas and tied in to the Grid Stations.

Soils were mainly a brownish to gray brown and in places the cover was very light. A generous amount of rotted wood and fire ash was present. Depth of samples were 6" to 12" and every effort was made to get below the "A" horizon.

Chemex Lab's analyzed the samples for the elements Cu and MO.

The Standard and accepted procedure for soil sample collecting were observed. A total of 337 soil samples and 52 Rock samples were taken.

Statement of Qualification:

The Author S.W. Barclay; a prospector and Field representative of Newmont Exploration for 25 years, now retired, supervised the work. I have had much experience with all phases of above work and have been closely associated on many projects including: Trout Lake Molly, Ajax Molly, Pelly River Project Yukon, etc.

STATEMENT OF COSTS

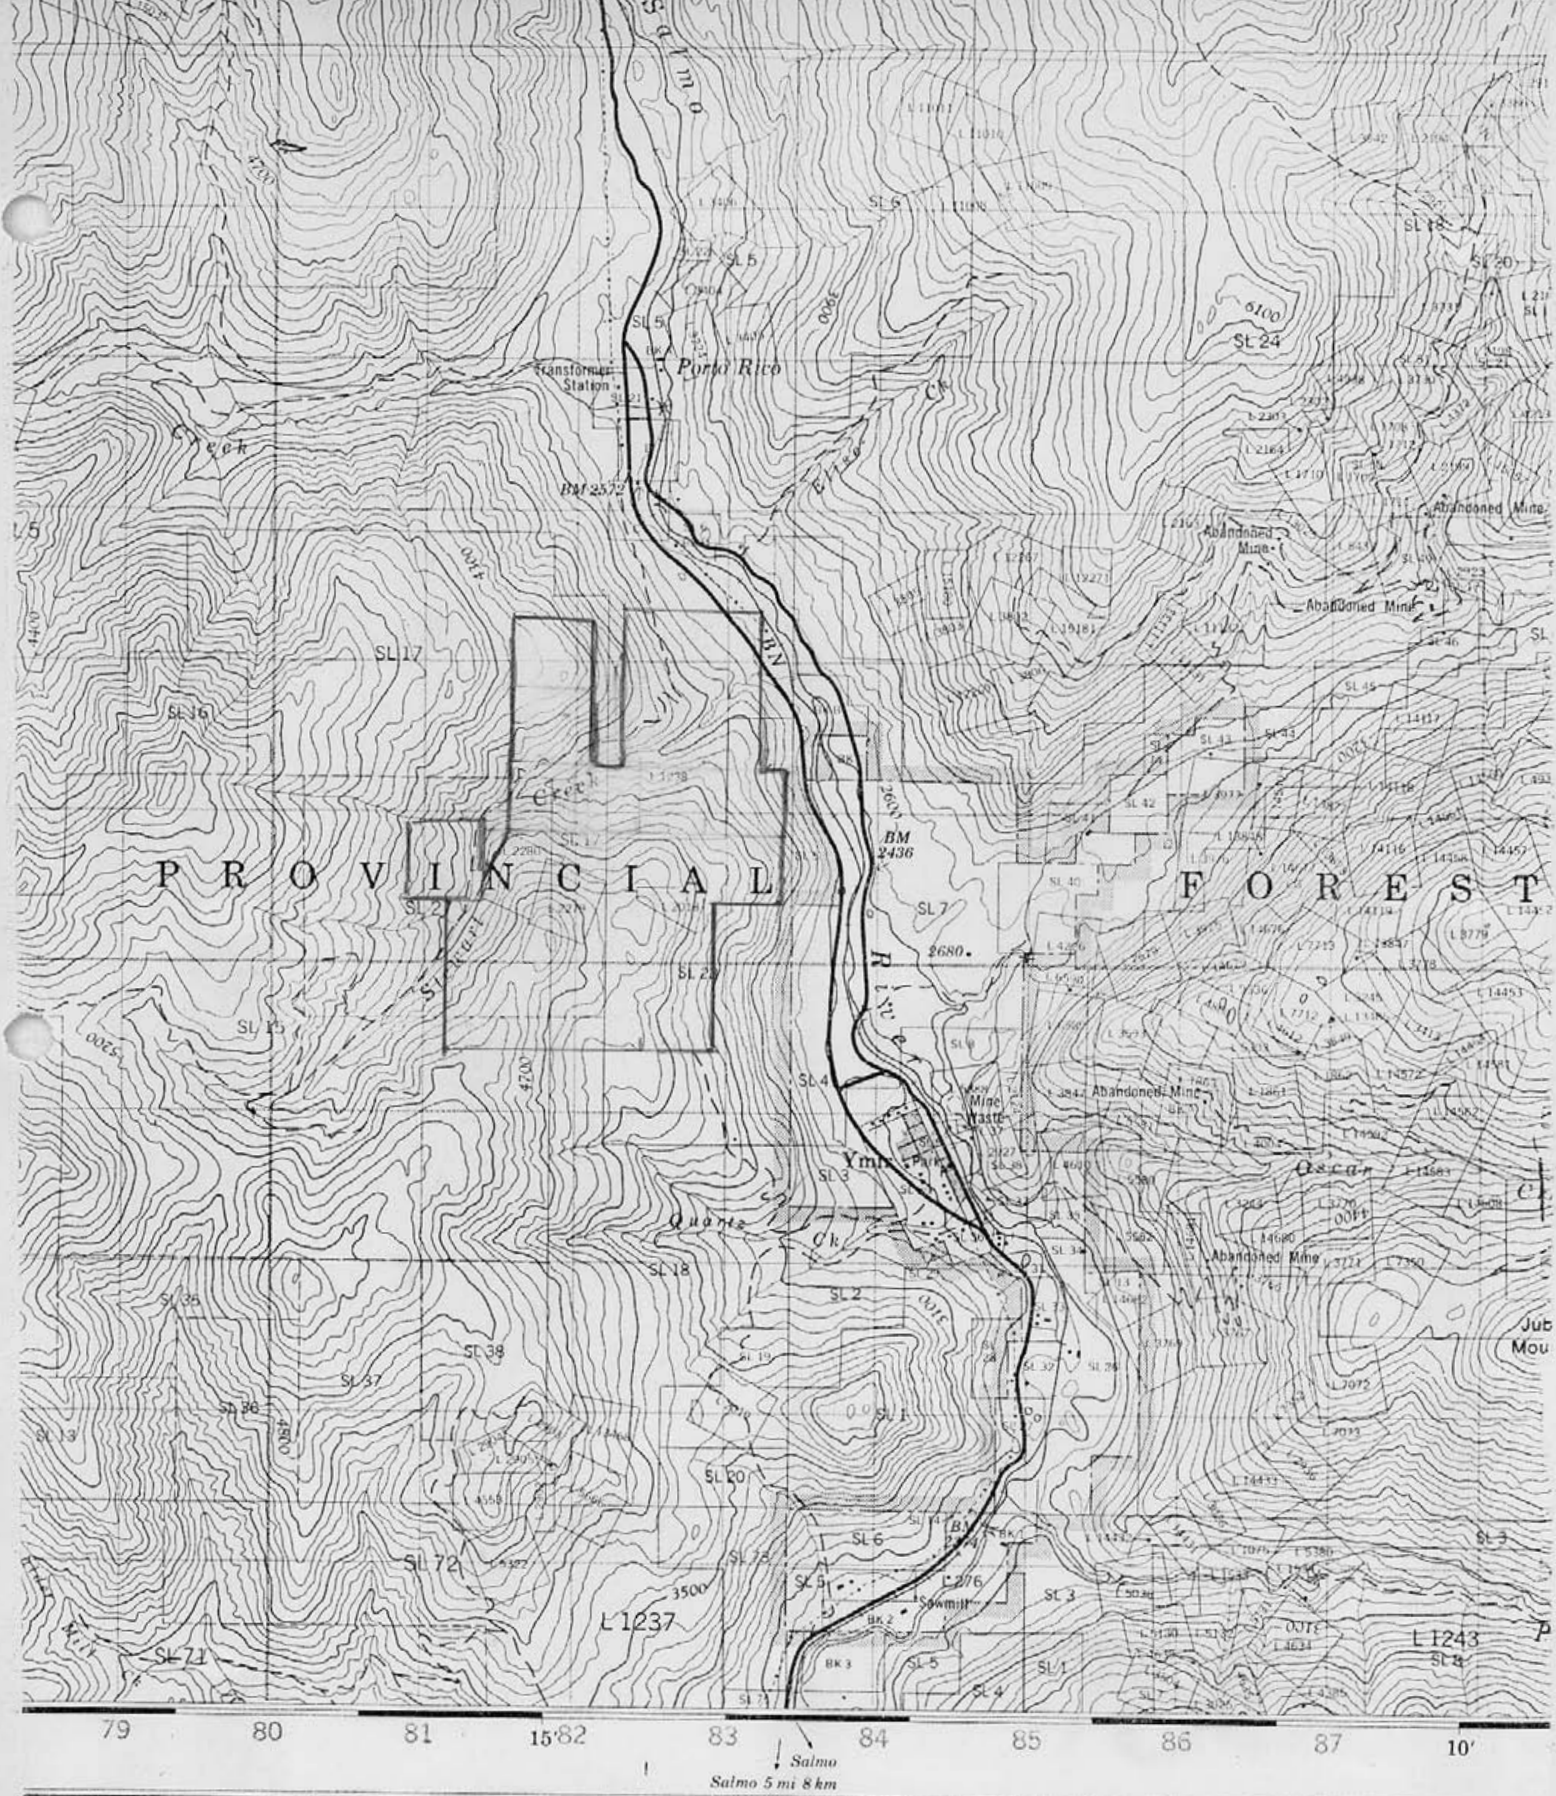

Work Period:

Work was carried out during June, July, and August 1979.

June 18-28	Tony Nijhuis	RR#3 Nelson, B. C. VIL 5P6	11 days @ \$56 per day	\$616.00
June 18-28	Charles Pittman	1424 Cedar St. Nelson, B.C.	11 days @ \$56 per day	\$616.00
June 18/	Russell Verishine	Crescent Valley, B. C. RR#1 Site #2 Comp#8	1 day @	56.00
July 9-13/16-19	Tony Nijhuis		9 days @ \$56.00	504.00
July 9-13/16-19	Charles Pittman		9 days @ \$56.00	504.00
August 22-26	Ben Nyhuis	RR#3 Nelson, B. C.	5 days @ \$56.00	280.00
August 22-26	Donald Martin	Box 63 Proctor, B.C.	5 days @ \$48.00	240.00

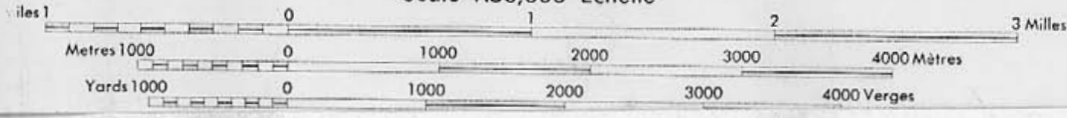

Cost:

Cost of analyses for CH and MO 337 Soils and 52 Rock Samples	1,146.45
Cook TENT Groceries	418.19
General Camp expenses	426.31
Helicopter Rental June, July 900.38/265.47	1,165.85
Grayhound Frieght Samples to CHEMEX 14.65/14.65/10.00	39.30
Transport Rental June 9 days @ 15.00/ July 12 days @ 15.00/August 12 @ 20.00	555.00
Gasoline June \$63.36/ July \$54.00/ August \$62.48	179.85
Total for June to August	<u>\$6,746.95</u>
