INTRODUCTION

The SATURDAY claim, Lot No. 2043, S.D.Y.D., is a single reverted Crown-granted mineral claim comprised of 37.40 acres.

GEOGRAPHIC LOCATION

The Saturday claim is located 1.5Km West of Hedley, B.C. on the North side of the Similkameen River. Highway #3 runs E-W through the property.

ACCESS TO CLAIM

Access to the Saturday claim is via the #3 Highway, 1.5Km west of Hedley. The roadside pull-out with the garbage disposal marks roughly the centre of the claim.

PROSPECTING REPORT

AREA PROSPECTED

The area prospected is roughly in the centre of the claim. The area of particular interest is 100m x 150m, where a green andesite porphyry dyke outcrops, cutting Nicola Group country rocks. The dyke and the contact zones were examined and sampled.

MINERALS SOUGHT

Gold was the mineral prospected for, as it is known to occur widespread throughout the Hedley area, and particularly adjacent to dykes, sills, and other intrusive bodies.

CONCLUSIONS

The dyke contains no gold itself but areas immediately adjacent to the dyke contained minor gold values.

Banbury Gold Mines Ltd.

M. R. Sanford,
Box 225,
Hedley, B. C. VOX IKO

Dear Mr. Sanford:

Here are the results of the samples
that you requested we assay for gold:

Norm #1: 0.032 oz./ton Au

Norm #2: 0.002 oz/ton Au

Norm #3: 0.004 oz/ton Au

Norm #4: 0.023 oz/ton Au

These were run for gold only
using our A. A. machine, IL 357.

sample = \$60.00.

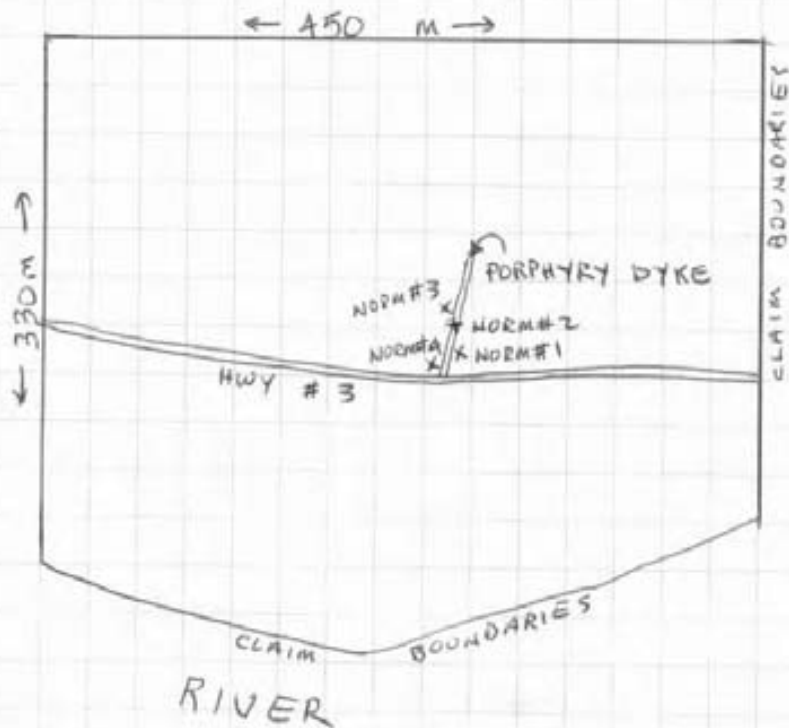

Please remit: 4 samples x \$15/

Yours truly,

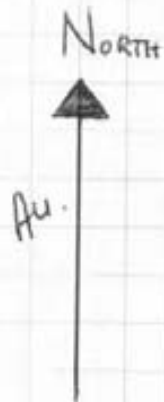

ASSAYER

MAP OF PROSPECTED AREA.

SAMPLES TAKEN:

NORM # 1	:	ALTERED ARGILLITE	.032 oz/ton
NORM # 2	:	PPH. DYKE	.002 oz/ton
NORM # 3	:	ARGILLITE	.004 oz/ton
NORM # 4	:	ALTERED ARGILLITE	.023 oz/ton

SCALE 1:4800

6.

ITEMIZED COST STATEMENT

Geological prospecting by M.R.Sanford October 27th 6 hrs. @ \$20/hr	\$120
Samples assayed Banbury Gold Mines Ltd. Lab 4 samples @ \$15/sample	\$ 60
Transportation expenses Gas and other	\$ 15
Report Preparation 1 1/2 hrs. @ \$20 Typing	\$ 30 \$ 12
TOTAL valuation of work	\$237
