PROSPECTING AND PHYSICAL REPORT  
ON THE POLY AND POLY 2 CLAIMS, VANCOUVER I.

INTRODUCTION AND DESCRIPTION

The Poly and Poly 2 consist of eight and ten units respectively. They are located on the eastern side of Chipman Creek. The centre of the claims is approximately twenty kilometres west of Crofton and can be reached by the Mac-Millan Bloodell Chemainus logging road to just past the Dunsmuir Power line. Access to the claims is then by the power line road and several old logging roads. All the roads are good except on the claims.

The writer located the claims in January 1985, part of the claim for the second time in four years. CanaMin Resources Ltd. is the beneficial owner of Poly and Poly2.

GENERAL GEOLOGY

Sicker rocks are predominant in the area followed by Nanaimo sediment. The sicker overlays the Nanaimo at least at three localities between the BonBon and Silver mineral claims. Also between Poly2, Tammy and the Western side of the Chemainus River, and in the Chemainus valley.

LOCAL GEOLOGY

On the Poly mineral claims, volcanic and sicker diorite cut the sedimentary sill (sicker) unit. To the northwest of the claim thin banded myra rocks are exposed in road cuts.

From the northern part of the Poly to the southern part of Poly2 sedimentary sill, myra and some Nitinat volcanic are exposed. These last ones are overlaying the Nanaimo sediments.

MINERALIZATION

On the Poly the sedimentary sills are metamorphized from poor slate to good slate, pyrite, pyrrhotite and traces of chalcopyrite occur concordant to bedding.

On Poly2 rhodonite in thin discontinuous bands occur associated with quartz in chert beds. Manganese oxides stain all rocks. Bull quartz is the predominant mineral.

#### WORK

Prospecting, rock chips sampling and two rock cuts were carried out on the property on the specified dates: Feb. 20, March 12 with Marino, March 15 half a day, April 1, 8, 9, 12 drilling with one cobra and a nonjar, blasting and cleaning the trenches, helped by Bruno Cosmacini. April 19 a VLF-EM sapling, 23 with Chandler of Falconbridge, 24 visited Forestry in Duncan in regard of tree reserve on property. August 14 with DeLane of Newmont, 18 with British Petroleum (SEICO), half a day on BonBon and half a day on Poly.

Thirty rock chip samples were collected and Fire Assay'd for Gold, ten for Mercury and twenty one for Silver.

APENDIX I

STATEMENT OF EXPENSES

SERVICES 14 day at \$200 per Day	\$ 2800.00
TRAVEL Km. 1235 X 40¢	204.00
Drill RENTAL 2 day X 70	140.00
Explosive	50.00
ASSAYS 31 X 10	310.00
Other supply	100.00
TOTAL	<u>3604.00</u>

APENDIX II

STATEMENT OF QUALIFICATION

I, Efrem Specogna of 1704 Centenary Dr., Nanaimo

B. C. ,certify that:

1. I am a self taught prospector.
2. I have been prospecting for over 20 years.
3. Beside many minor discoveries, I co-discovered the Babe property ( now Cinola), the Bella & Marino ,on Queen Charlotte Island.
4. On Vancouver Island,I discovered:  
The Villalta, the Amore, the Jackie, the Carol Cobalt, this last a 1985 discovery.
5. I consider my performance to be my best qualification.

E. Specogna Free Miner
