MINING DIVISIONS: FORT STEELE

ACCESS TO THE GARNNET CLAIMS

Access to the Garnnet Claims was by 4x4 truck from Cranbrook to 30 kms on the ST MARY'S road, there we set up camp. From camp we drove a short distance and then walked up Argile Cr. to the Garnnet Claims.

PROSPECTING ACTIVITY

Eleven days for two prospectors and one day for one prospector, a total of twenty three man days were spent prospecting and taking rock samples. The terrain was very steep with many rock bluffs which made it very slow going. We found three old adits, there is know record of the diggings in the mineral office, but judging the size of the trees on the dump from these adits I would say the work was done in the early 1800s. Some of the samples we took from the mineralization was resampled later on in the year and tested for Ni. Co. Au. Pt. Pd.

ROCK FORMATIONS AND MINERALIZATION

In the south east portion of the claim we found a diorite sill striking at 320 degrees AZ and dipping 90 degrees. This sill was found within the Aldridge Quartsites and hosted by massive sulphides, calcopyrites and garnets. To the north west of the claim there is a unmineralized pegmetite dyke, this also is within the Aldridge Quartsites. A few kms. to the west there is records of Ni. & Co. being found in diorite formation, I believe this to of the same sill. The mineralization we found was Ni, Co, Au, Pt, Pd, Pb and Cu.

EXPENSES

Wages for 23 man days @ \$ 150.00 per day-----\$ 3450.00

Eleven days for two prospectors and one day for 1 prospector
days prospecting July 9th, /10th,/11th,/12,/ 13,/14,/15,/16,/17,/Aug.10th,/ 23rd,/28th.

Transportation -----\$ 900.00

4x4 truck for 12 days @ \$ 75.00 per day

Living Expenses camp food etc. @ \$ 60.00 per day-----\$ 1380.00

Assaying costs -----\$ 720.62

33 rock samples @ \$12.10, 33 rock sample preparation @ \$3.96
5 Ni. & Co. assay @ \$ 9.20 5 Au. Pt.& Pd by fire assay @ \$19.50
7% GST

Prospecting supplies & report preparation-----\$ 301.67

Flagging tape, rock sample bags tags etc.

Total-----\$ 6450.62

Cranbrook, B.C. V1C 4C9Telephone (604) 426-6277
Fax (604) 426-6219GARNET PROPERTY EXAMINATION REPORTLocation North side of St. Marys Lake, 20 km west of Kimberley.Claims 3Nx2E block, LCP 214397 by F. Fairclough. Tenure expires Aug. 23/96.Mineralization The zone of interest extends from a weakly mineralized outcrop at 4290 ft. elev. down to main showing (short tunnel & shaft) at 4180 ft. elev., a distance of approximately 400 ft. of strike. The occurrence appears to be a diorite sill about 5 feet thick, striking Az 320° and dipping at -90°, and contained within Aldridge quartzites. The host material contains feldspar, hornblende, massive sulphides and well developed garnets. The massive sulphide is presented with calcopyrite along the margin. Assays for Ni/Co/Cu and AG/Au are underway.

An unmineralized quartz vein was seen cross cutting the sill in an east-west direction.

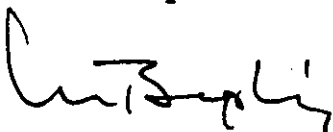

Potential The size of the sill could be extensive. The 1916 Min. of Mines report on the Whitefish Creek and Alliance Groups refers to the north block as the "supposed continuation accross the valley" of the southern exposure. It is unlikely to be mineralized throughout. An opinion of the size of the outcrop is a zone 500 feet wide x 1000 feet high and 5 feet wide x 1/2 (to account for the mountain slope). This would total about 100,000 - 150,000 tons.

Previous samples indicate the mineralization consists of pyrrhotite with chalcopyrite, and low values in silver and gold.

Two things are needed to make the deposit of economic interest - value and size.

No records exist indicating whether the deposit carries nickel, although there are references to seeing native copper and erythrite (cobalt bloom). If the samples show presence of nickel at >0.5% then the property should be drilled.

Size is not a major concern at the moment, as there is ample opportunity to develop size along the sill to depth.

Conclusion Potential of the property depends upon assay values.Recommendation If nickel shows up in the assays, the property should be optioned.M. Bapty, P.Eng.

APPENDIX C

QUALIFICATIONS

Lifetime prospector, I have worked on the Gold Dredges in the Yukon and for several exploration companies, I have had mineral property optioned to Exploration Companies in the past and at the present time have the Garnet claims optioned to Barkhor Resources.
