Introduction

This Addendum was prepared to clarify some parts of "Report on Trenching, Drilling and Metallurgical Testing on the Congress Property", Dunn, D.S.C., 2006 (AR 28346) [the report].

The MMI survey is described on pages 9 and 10 of the report. Anomalous zones are shown on Map 1. The samples were taken at approximately 20 centimetres depth regardless of material. The bulk of the material sampled was Mt. Meager Quarternary rhyolite ash. SGS Canada Inc., one of the franchise holders for the proprietory MMI system, was contacted to verify if this sampling medium would work. The authour was told that this medium would work as was amply demonstrated in the orientation survey described in paragraph 5 of page 9 of the report.

Assay certificates from SGS, Eco-Tech and Acme Analytical were inadvertently not included in the report. These assay certificates are included in Appendix B of this Addendum.

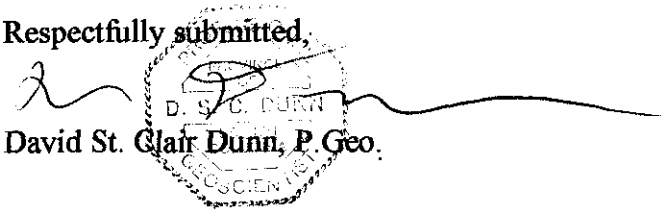
The request for a different compilation of the report to conform with Schedule A of the Regulations is believed to refer to a more specific breakdown of time spent on the property by the various workers. This information has been added to the Statement of Costs and is shown in Appendix A.

Comments on Costs

The authour was requested to justify the costs of a trailer rental for six months and excavator lease for four months on a 50 day program. The 50 days of the program were carried out over a six month period, as shown in Appendix A. The cost of accommodations at the Gold Bridge Hotel, the only reasonable alternative, for this amount of time would have been 50 days @ $80/day or $4,000 + tax. The cost of the trailer was six months @ $375/month or $2,250. Aside from the lower base cost, the trailer also provided a semi-permanent base for the project plus allowed project personnel to prepare some meals. The overall saving in the longer term rental versus hotel accomadation was in the order of $2,500.

Likewise the excavator was leased on a monthly basis and used intermittently on the project. The cost of the lease, fuel and operator was $70,232.55. Renting a similar machine on a casual basis would have cost 50 days @ 10 hours/day @ $168/hour or $84,000 + tax. Leasing the excavator saved the project over $14,000. If further details are required, please contact the authour directly.

Respectfully submitted,



David St. Clair Dunn, P.Geo.

GROUP 1D - 0.50 GM SAMPLE LEACHED WITH 3 ML 2-2-2 HCL-HNO3-H2O AT 95 DEG. C FOR ONE HOUR, DILUTED TO 10 ML, ANALYSED BY ICP-ES.
(>) CONCENTRATION EXCEEDS UPPER LIMITS. SOME MINERALS MAY BE PARTIALLY ATTACKED. REFRACTORY AND GRAPHITIC SAMPLES CAN LIMIT AU SOLUBILITY.
ASSAY RECOMMENDED FOR ROCK AND CORE SAMPLES IF CU PB ZN AS > 1%, AG > 30 PPM & AU > 1000 PPB
- SAMPLE TYPE: ROCK R150 60C AU* IGNITED, ACID LEACHED, ANALYZED BY ICP-MS. (15 gm)
