Note: Unless otherwise referenced, map submissions are enhanced excerpts from the BC Ministry's Provincial Mapping System. Scale as that shown.

Introduction & Location

The Sowaqua 3 property, tenure # 575839, a 4 cell mineral claim comprising 84.13 hectares, is situate along Sowaqua Creek, 16 kilometers east of Hope, BC. The claim lies to the east of the Hozameen Fault, a northwest trending serpentine belt, more commonly known as the Coquihalla Gold Belt. The region is notarized for hosting gold-bearing mineralization, with the more prominent deposit being that of the Carolin Mine, situate approximately 13 kilometers to the north-northwest.

Access

Access to the property is gained via the Sowaqua Creek Road, a two-lane graveled forestry road, exiting BC Highway #5 (the Coquihalla Highway) at the Sowaqua Creek turnoff, fifteen kilometers north of the BC Highway #3 intersect..

Summary & Conclusion

The slope on the south side of the roadway was descended to creek level, where pan sampling was carried out, in attempt to identify any existence of metal/mineral presence which might have borne relevance to down-slope migration. Approximately one and a quarter cubic metres of gravel had been worked over an eighty metre stretch of the creek's north bank. Though slightly less than seven grains of fine gold had been recovered, it could not, however, be determined if the origin were upslope or if the gold had washed there from further up the creek.

Work Evaluation & Cost Statement

-- 10.0 Man Hours Prospecting --

Labor –	June 22, 2008	5.0 hours	\$ 100.00
Supervisory –	June 22, 2008	5.0 hours	<u>\$ 150.00</u>
Total Work Credits			\$ 250.00

Meal Costs			<u>\$ 20.20</u>
		Sub Total	\$ 270.20
Allowable Vehicle Expenses (20%)			\$ 54.04
Report Preparation			<u>\$ 60.00</u>
		Total	\$ 384.24

Attending Parties & Qualifications:

Dave Chamberlain -- 4 years prospecting experience
Larry Amey -- 29 years prospecting experience

May 3, 2009
