BIRD PROPERTY

ROCK GEOCHEMISTRY REPORT

Craig Kennedy

February 2011

1.00 INTRODUCTION

1.10 Location and Access

The Property is located in the Omineca Mining Division of central BC, NTS 093.F065. Very good access is provided by the Holy Cross logging road, Marilla logging road and secondary haul roads on the property.

1.20 Property

The Bird Property is covered by tenures 672663, 672683 and 751282. It is owned by Fred H. Critchlow of Kaslo BC.

1.30 History of Previous Exploration

The Bird Property area has been held by exploration companies and individuals through the past 30 years.

1.40 Summary

The Bird Property is one of a number of properties hosted by the postulated Nechako Arch. Kootenay Gold Inc. Entered into a grubstake agreement with prospector Fred Critchlow to evaluate, then elect on those properties fitting Kootenay Gold's exploration criteria. The Nechako Arch is an exploration concept contained within a north-eastern running structural zone, which since Eocene time has been defined by strongly developed geomorphology. This geomorphology is delineated by stream and lake patterns. The general area hosts geology predominantly consisting of Jurassic through to tertiary volcanic and intrusive rocks. The metal mine which keys the area is the impressive Endako Molybdenum porphyry deposit, approximately 40 kilometres to the north west of the property. As with most of the Nechako plateau bedrock occurrence is sparse but where available provides opportunity to view prominent structure controls and alteration styles. Jurassic

and cretaceous intrusive rocks and Eocene volcanic rocks are the most common in Kootenay Gold's area of interest. These rocks are exposed as structural islands where northeast structure is cut by north-western structural systems.

It is speculated that the Endako deposit is a sub-hot-spring system, which has been exposed by structural uplift and erosion. A key exploration clue is the Endako mine area is host to many age and phase type intrusive, a piston geological environment. The above feature is common in Kootenay Gold's area of interest and may in fact be diagnostic of the Nechako arch. Structural blocks with heterogenous intrusive exposures maybe exposed too or below porphyry levels opening opportunity for shear zone and, or stockwork gold systems. Structural blocks with volcanic cover and hot spring alteration can be considered potential porphyry targets. These opportunities within this type of structural zone (Nechako Arch) provide encouragement for discovery of a large bulk mineable gold deposit. This target type is Kootenay Gold's favoured focus.

Figure 1: Regional Location Map

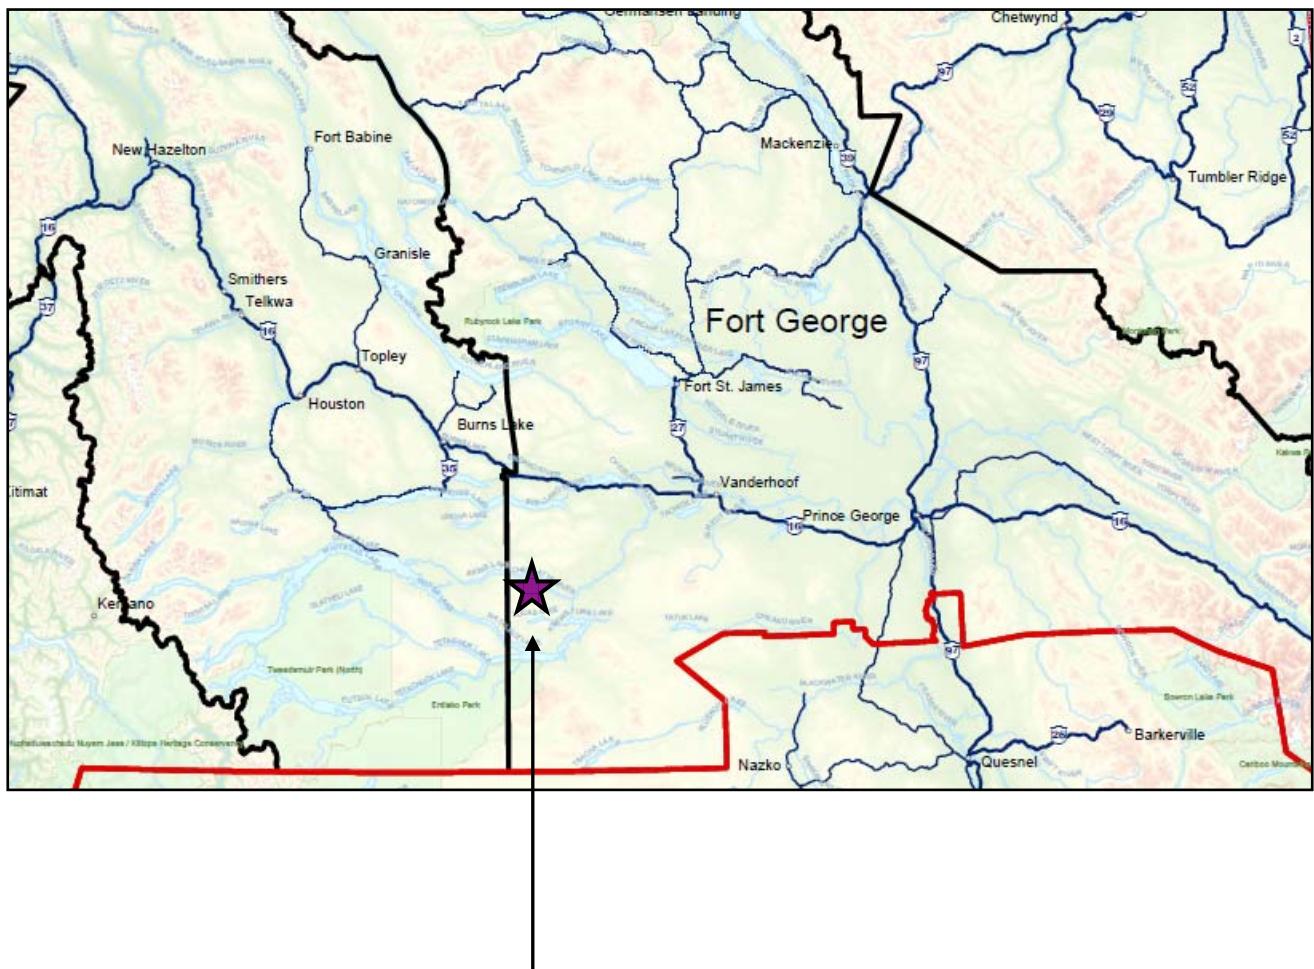

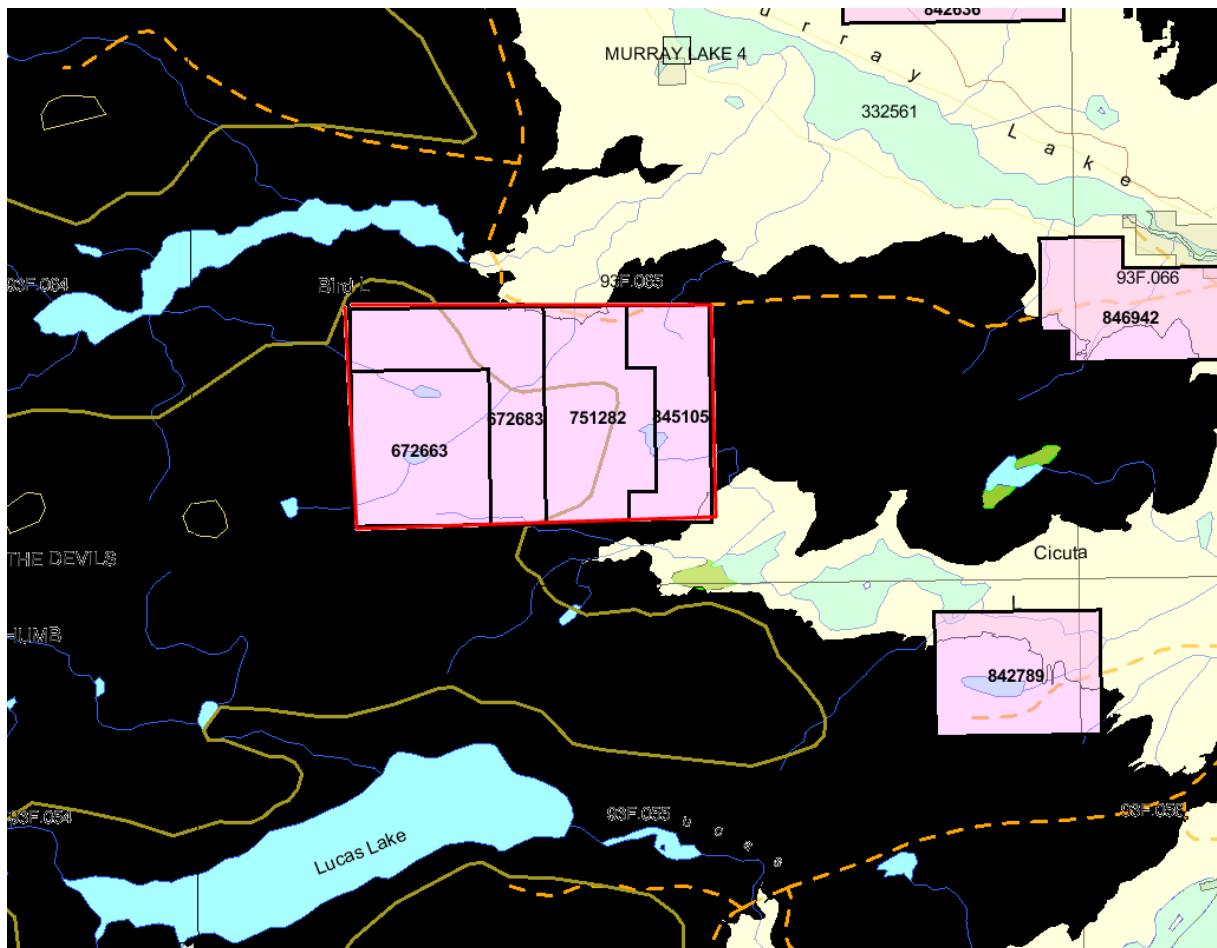

Figure 2: Claim Location Map

Map # 093F.065

Scale 1:100,000

2.00 ROCK GEOCHEMISRTY

The present area of interest is a structural zone which strikes NNW through the middle of the Bird Property. Bedrock exposures are sparse but where observed show signs of alteration diagnostic of structure. Exposures within the structural zone are andesites and/or basalts which are cut by narrow diorite to gabbro dikes.

Dikes in most cases are more resistant than the bedrock they cut and are recognized by their elevated character. Some dikes are also porphyritic with colors ranging bluish green to green. The blue-green color may in fact be an alteration?? Outcrop alteration noted is bleaching and a pink to orange pink coloration. ("K" spar?) Epidote, albite and chlorite are the most extensive alteration, the strongest alteration occurs as linear zones or vein like panels. This type of epidote, albite and chlorite can be traced in outcrop in excess of 2.5 km. Outcrops closer to the structure show a carbonate flooding and crackle breccia texture. Disseminated pyrite with rare chalcopyrite can be seen associated with the crackle breccia zones. The best copper mineralization observed exists as blebs with calcite and quartz veining and in disseminations with rusty albite-epidote-chlorite panels. Hematite was noted in some areas and occurs mostly associated with epidote-chlorite alterations. Other alteration noted was actinolite-tremolite, manganese and garnet. One extensive area of serpentanite with weak copper mineralization was noted in the valley bottom along the projection of the structure.

3.00 CONCLUSION

A structural zone hosting different styles of alteration along with pyrite, hematite and copper minerals exists on the Bird Property. The NNW striking structure dissects the center of the property. Copper mineralization associated with diking and carbonate flooding provides incentive for more exploration within the area. Most of the epithermal hot spring systems within the area are associated with northwest-northeast structural intersections. Mineralization within these systems seems to zone from molybdenum in the core to copper on the edges. Gold in the Nechako is found in core zones and along the structural edges of the hot spring systems.

4.00 STATEMENT OF EXPENDITURES

Prospecting & Rock Geochemistry
Swanson Property

Work performed: Summer 2010

Prospecting Contractors:

Fred Critchlow - 5 days @ 500/day (Includes 4x4 vehicle)	\$2500.00
Craig Kennedy - 5 days @ 350/day	1750.00
ATV Rental	375.00
Acme Labs – 52 rock samples (incl. freight)	1457.00
Accommodations & Food	1100.00
Craig Kennedy - report preparation and writing	700.00
Misc supplies & maps, drafting, etc.	<u>200.00</u>
Total:	<u>\$8082.00</u>

5.00 AUTHOR'S QUALIFICATIONS

As the author of this report I, Craig Kennedy, certify that:

1. I am an independent prospector residing at 2290 Dewolfe Avenue, Kimberley, BC.
2. I have been actively prospecting in the East and West Kootenays district of BC for the past 32 years and have made my living prospecting for the past 23 years.
3. I have been employed as a professional prospector by major and junior mineral exploration companies.
4. I own and maintain mineral claims in BC and have optioned numerous claims to various exploration companies.

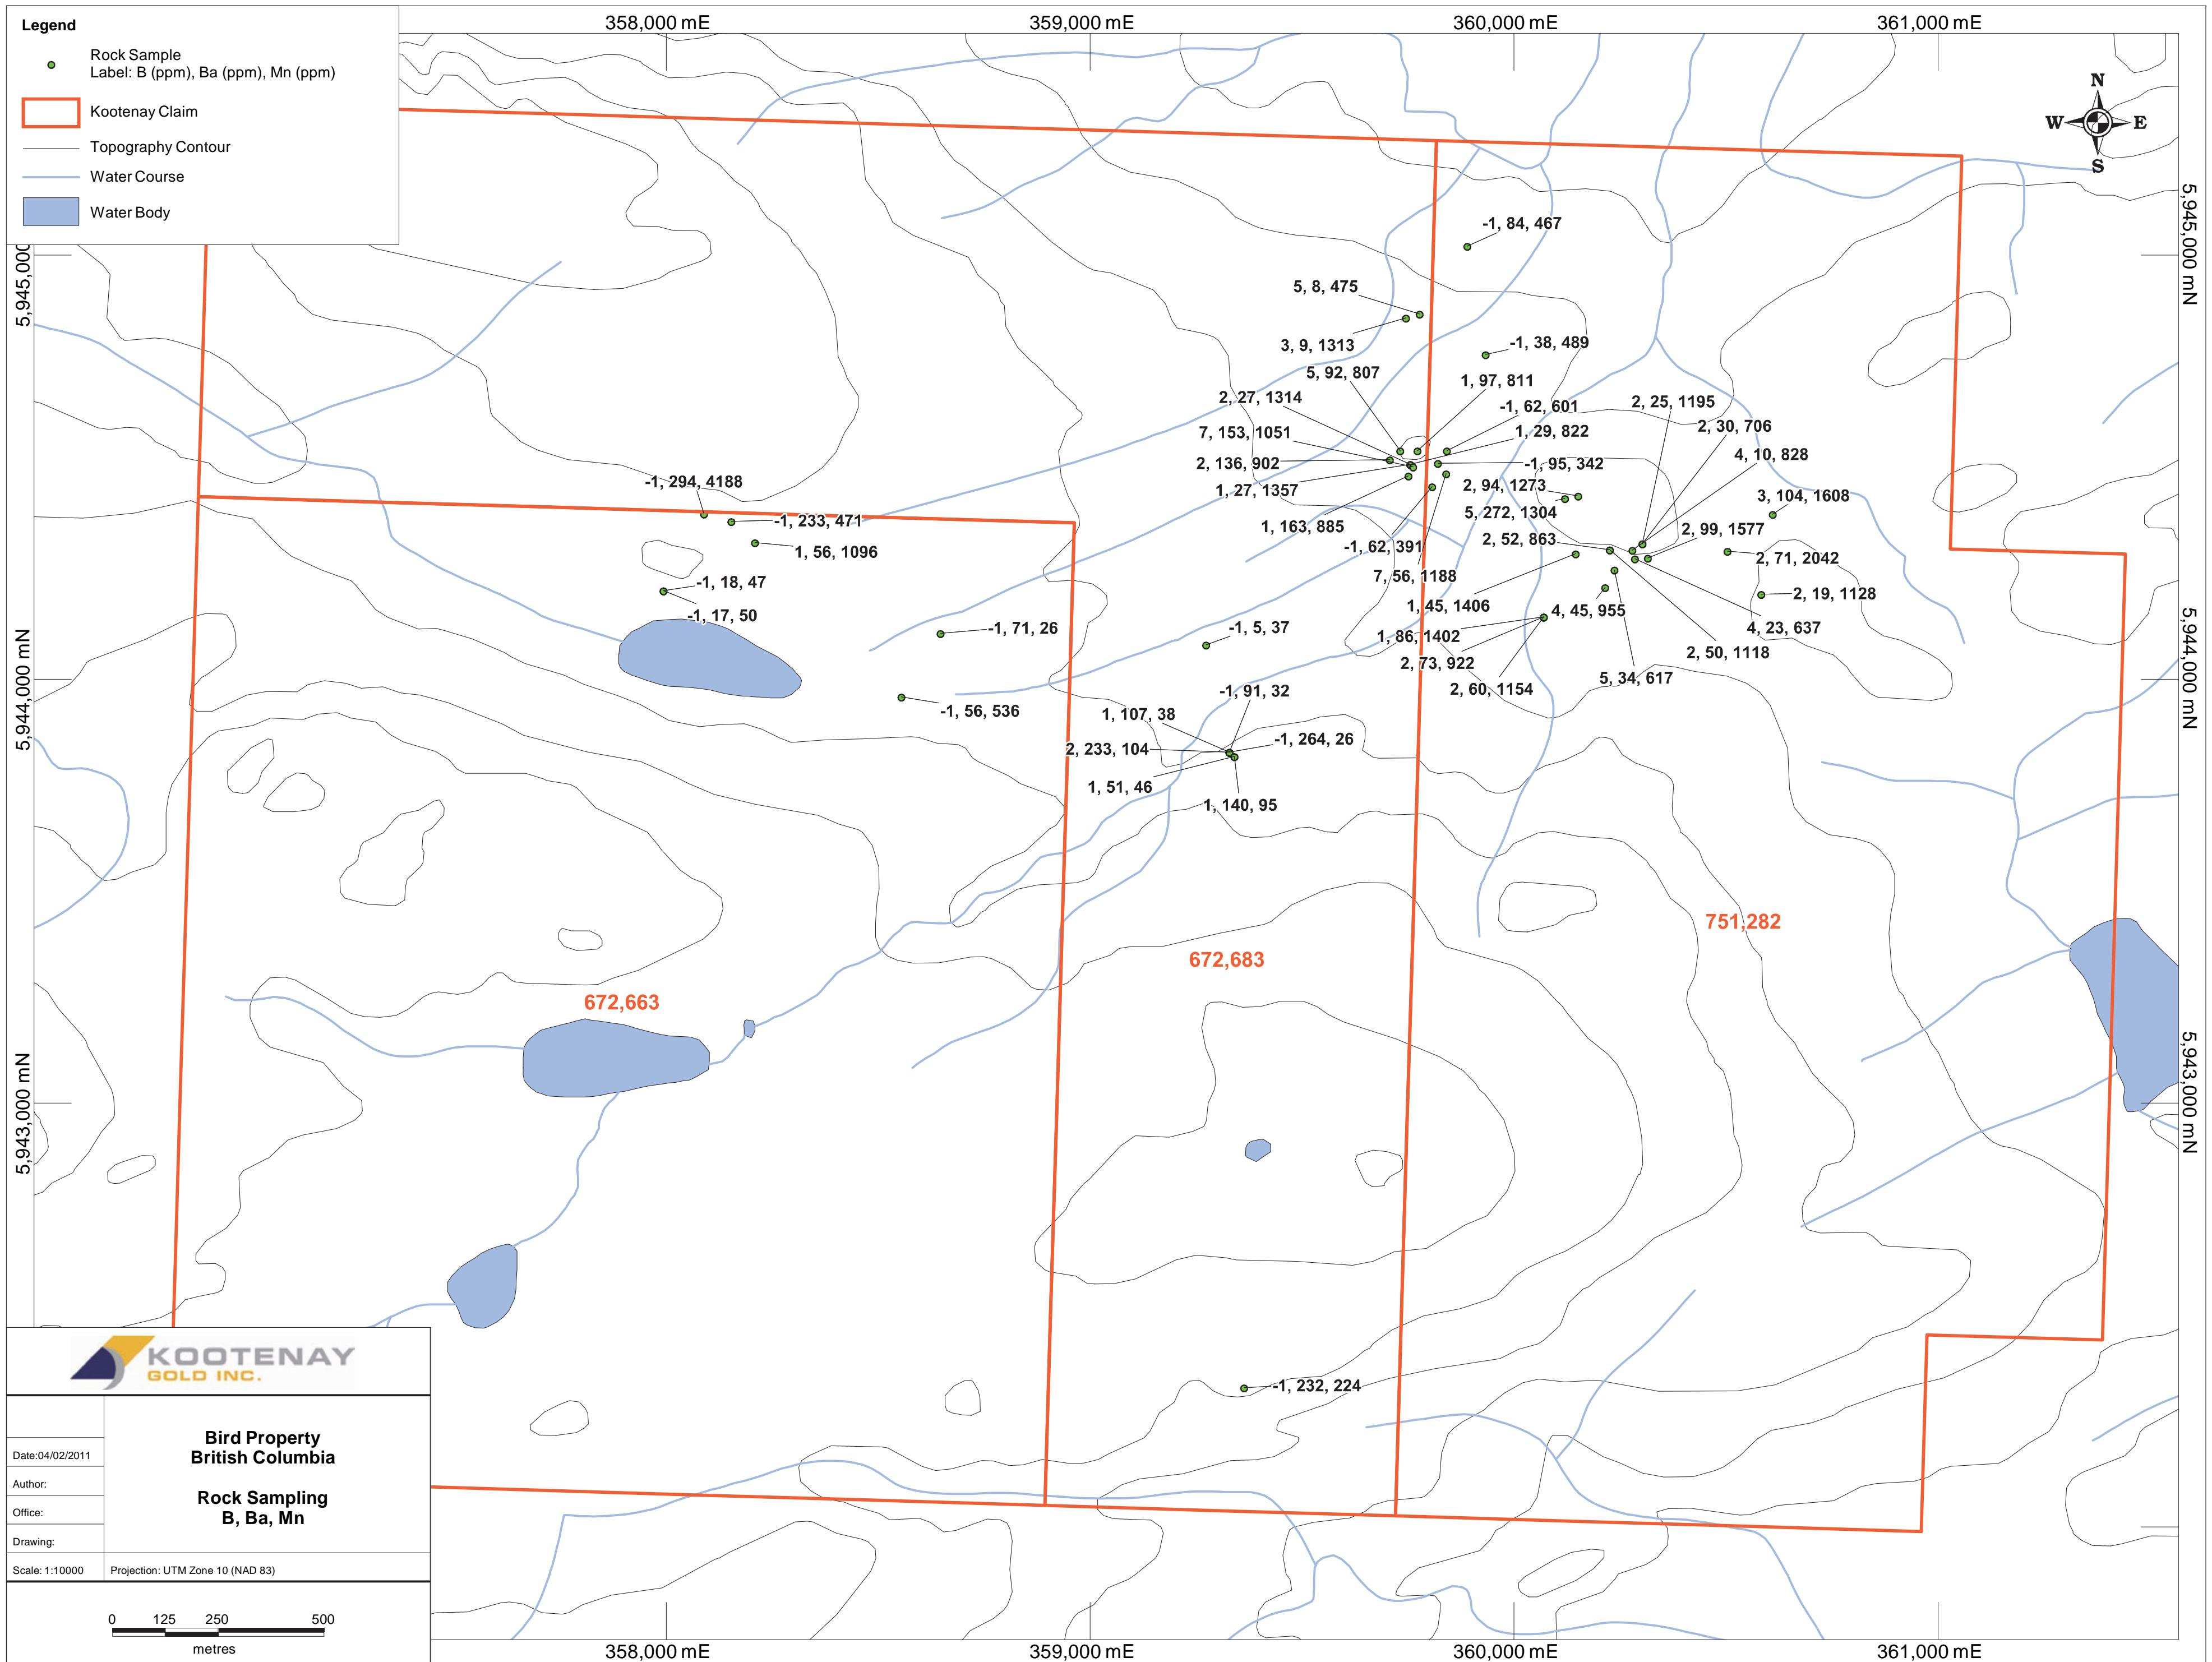

Craig Kennedy
Prospector

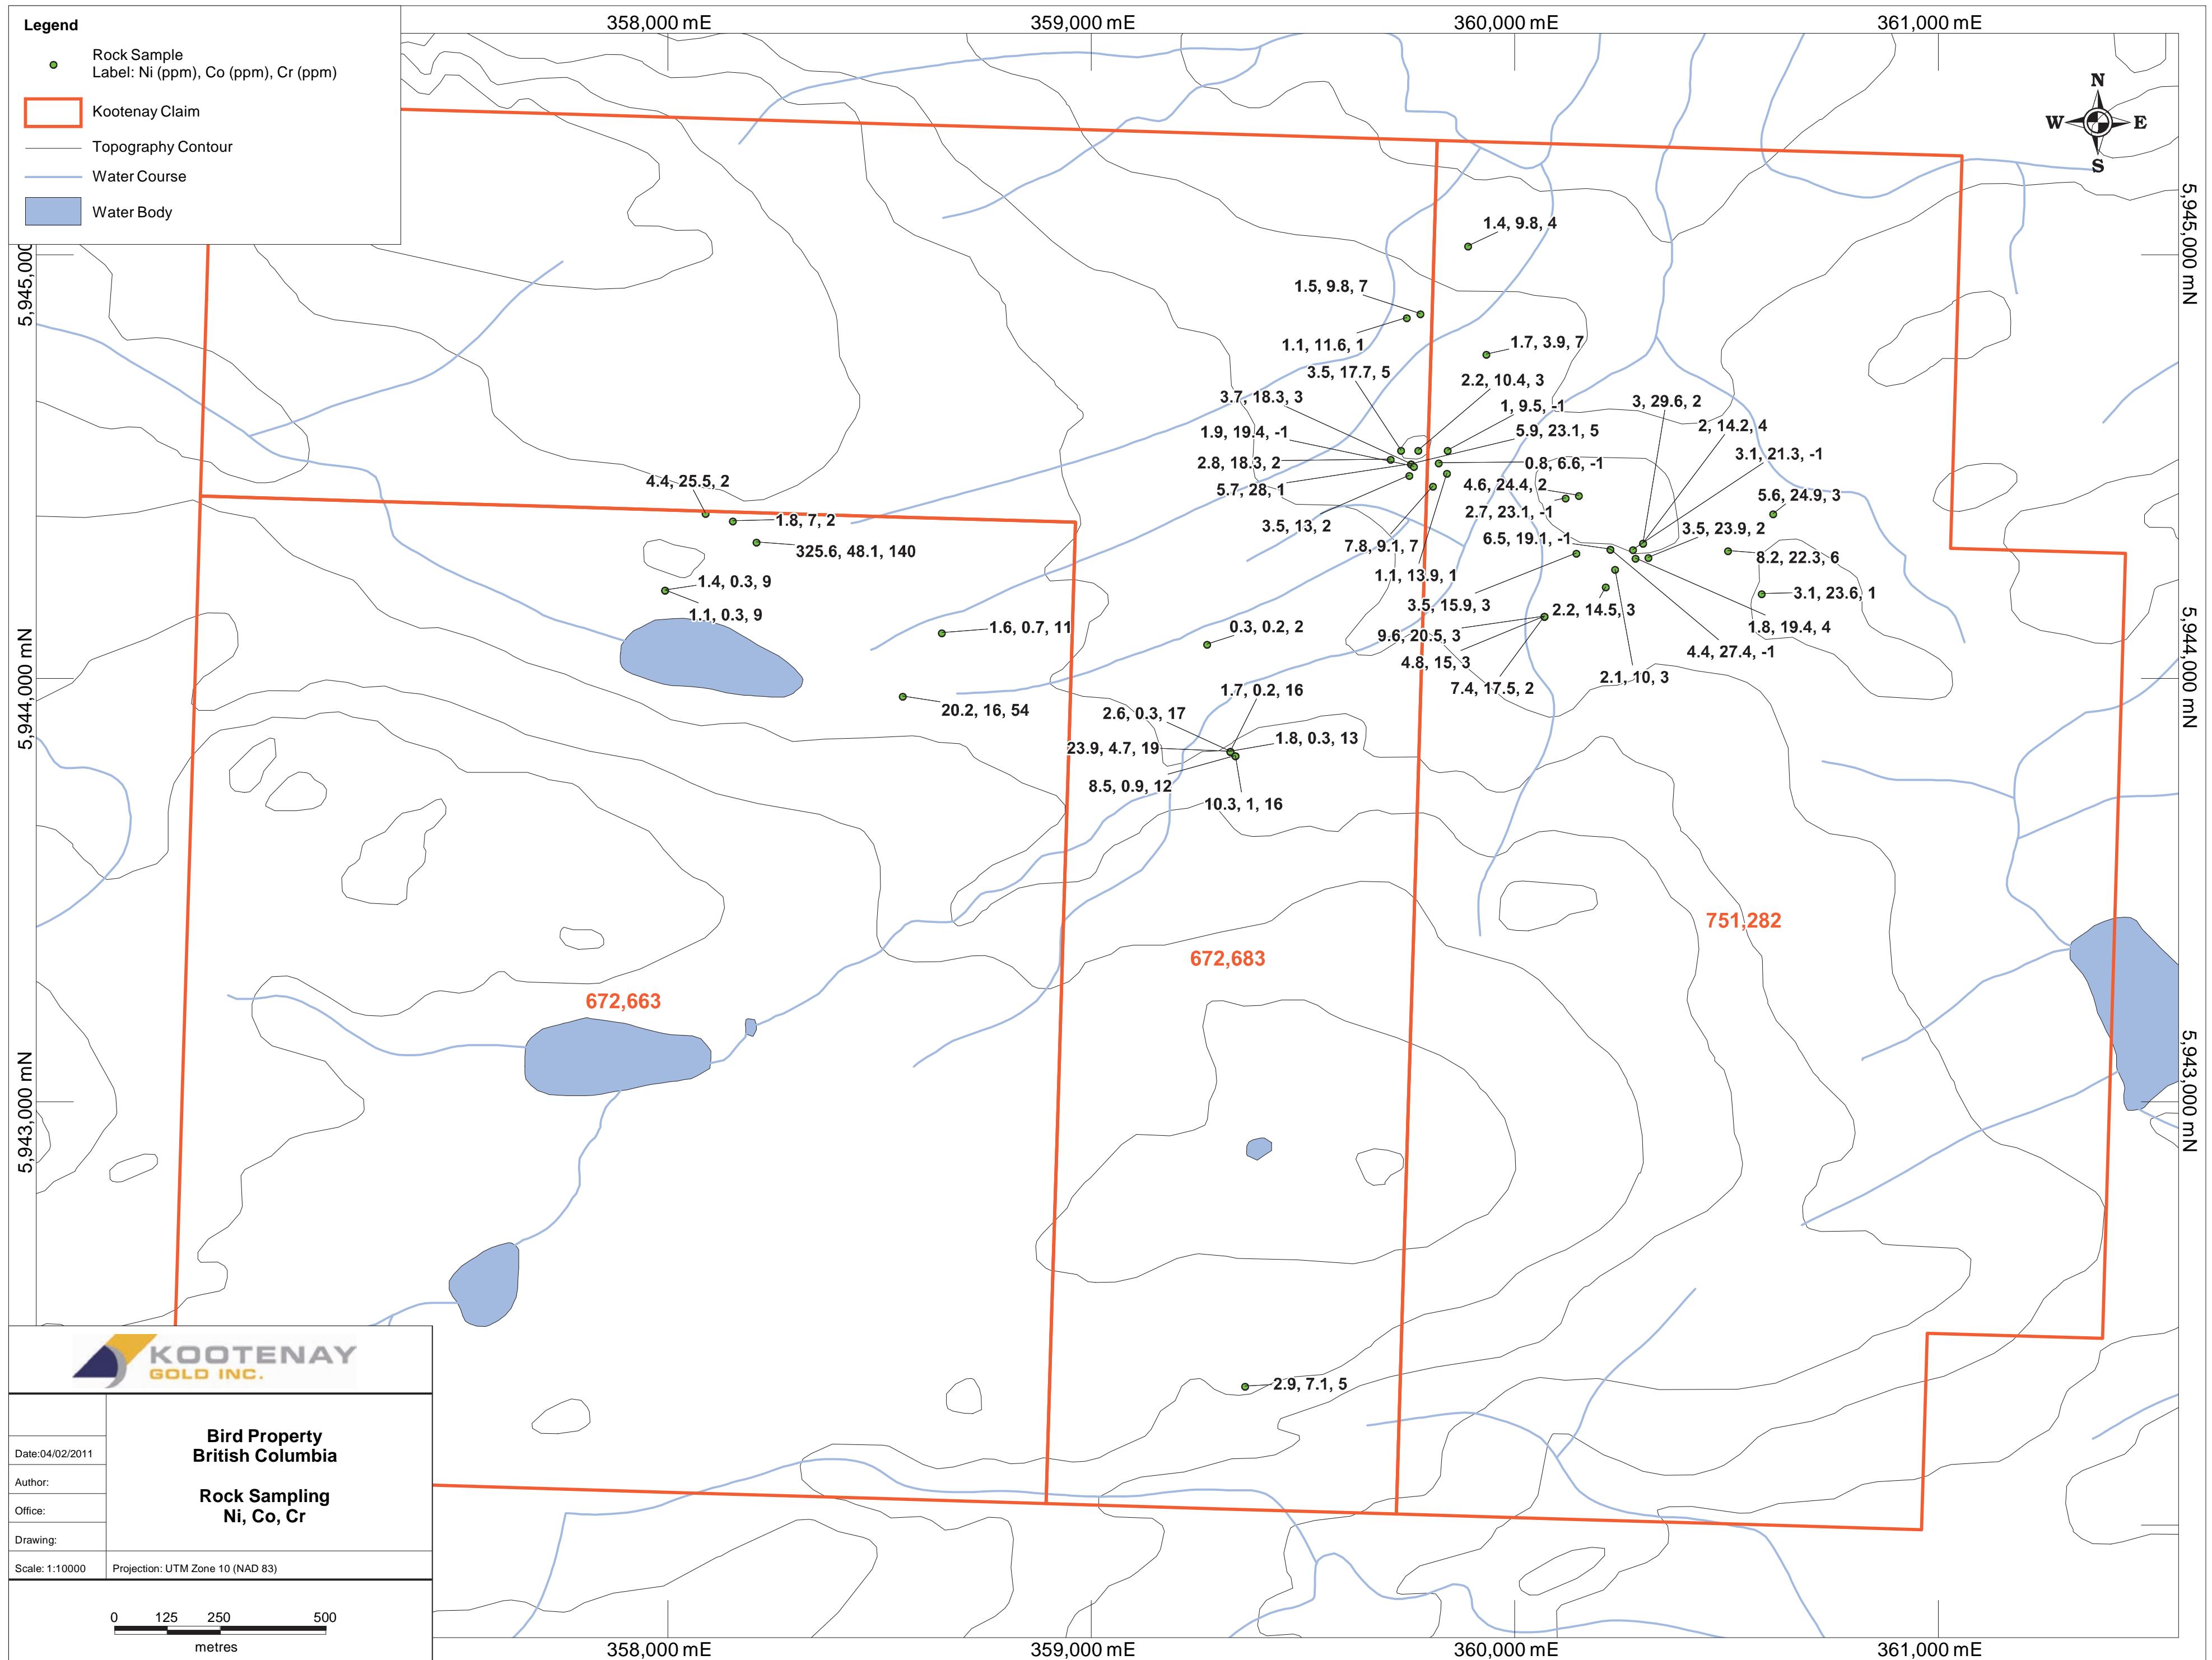

Appendix #1 - Rock Sample Descriptions

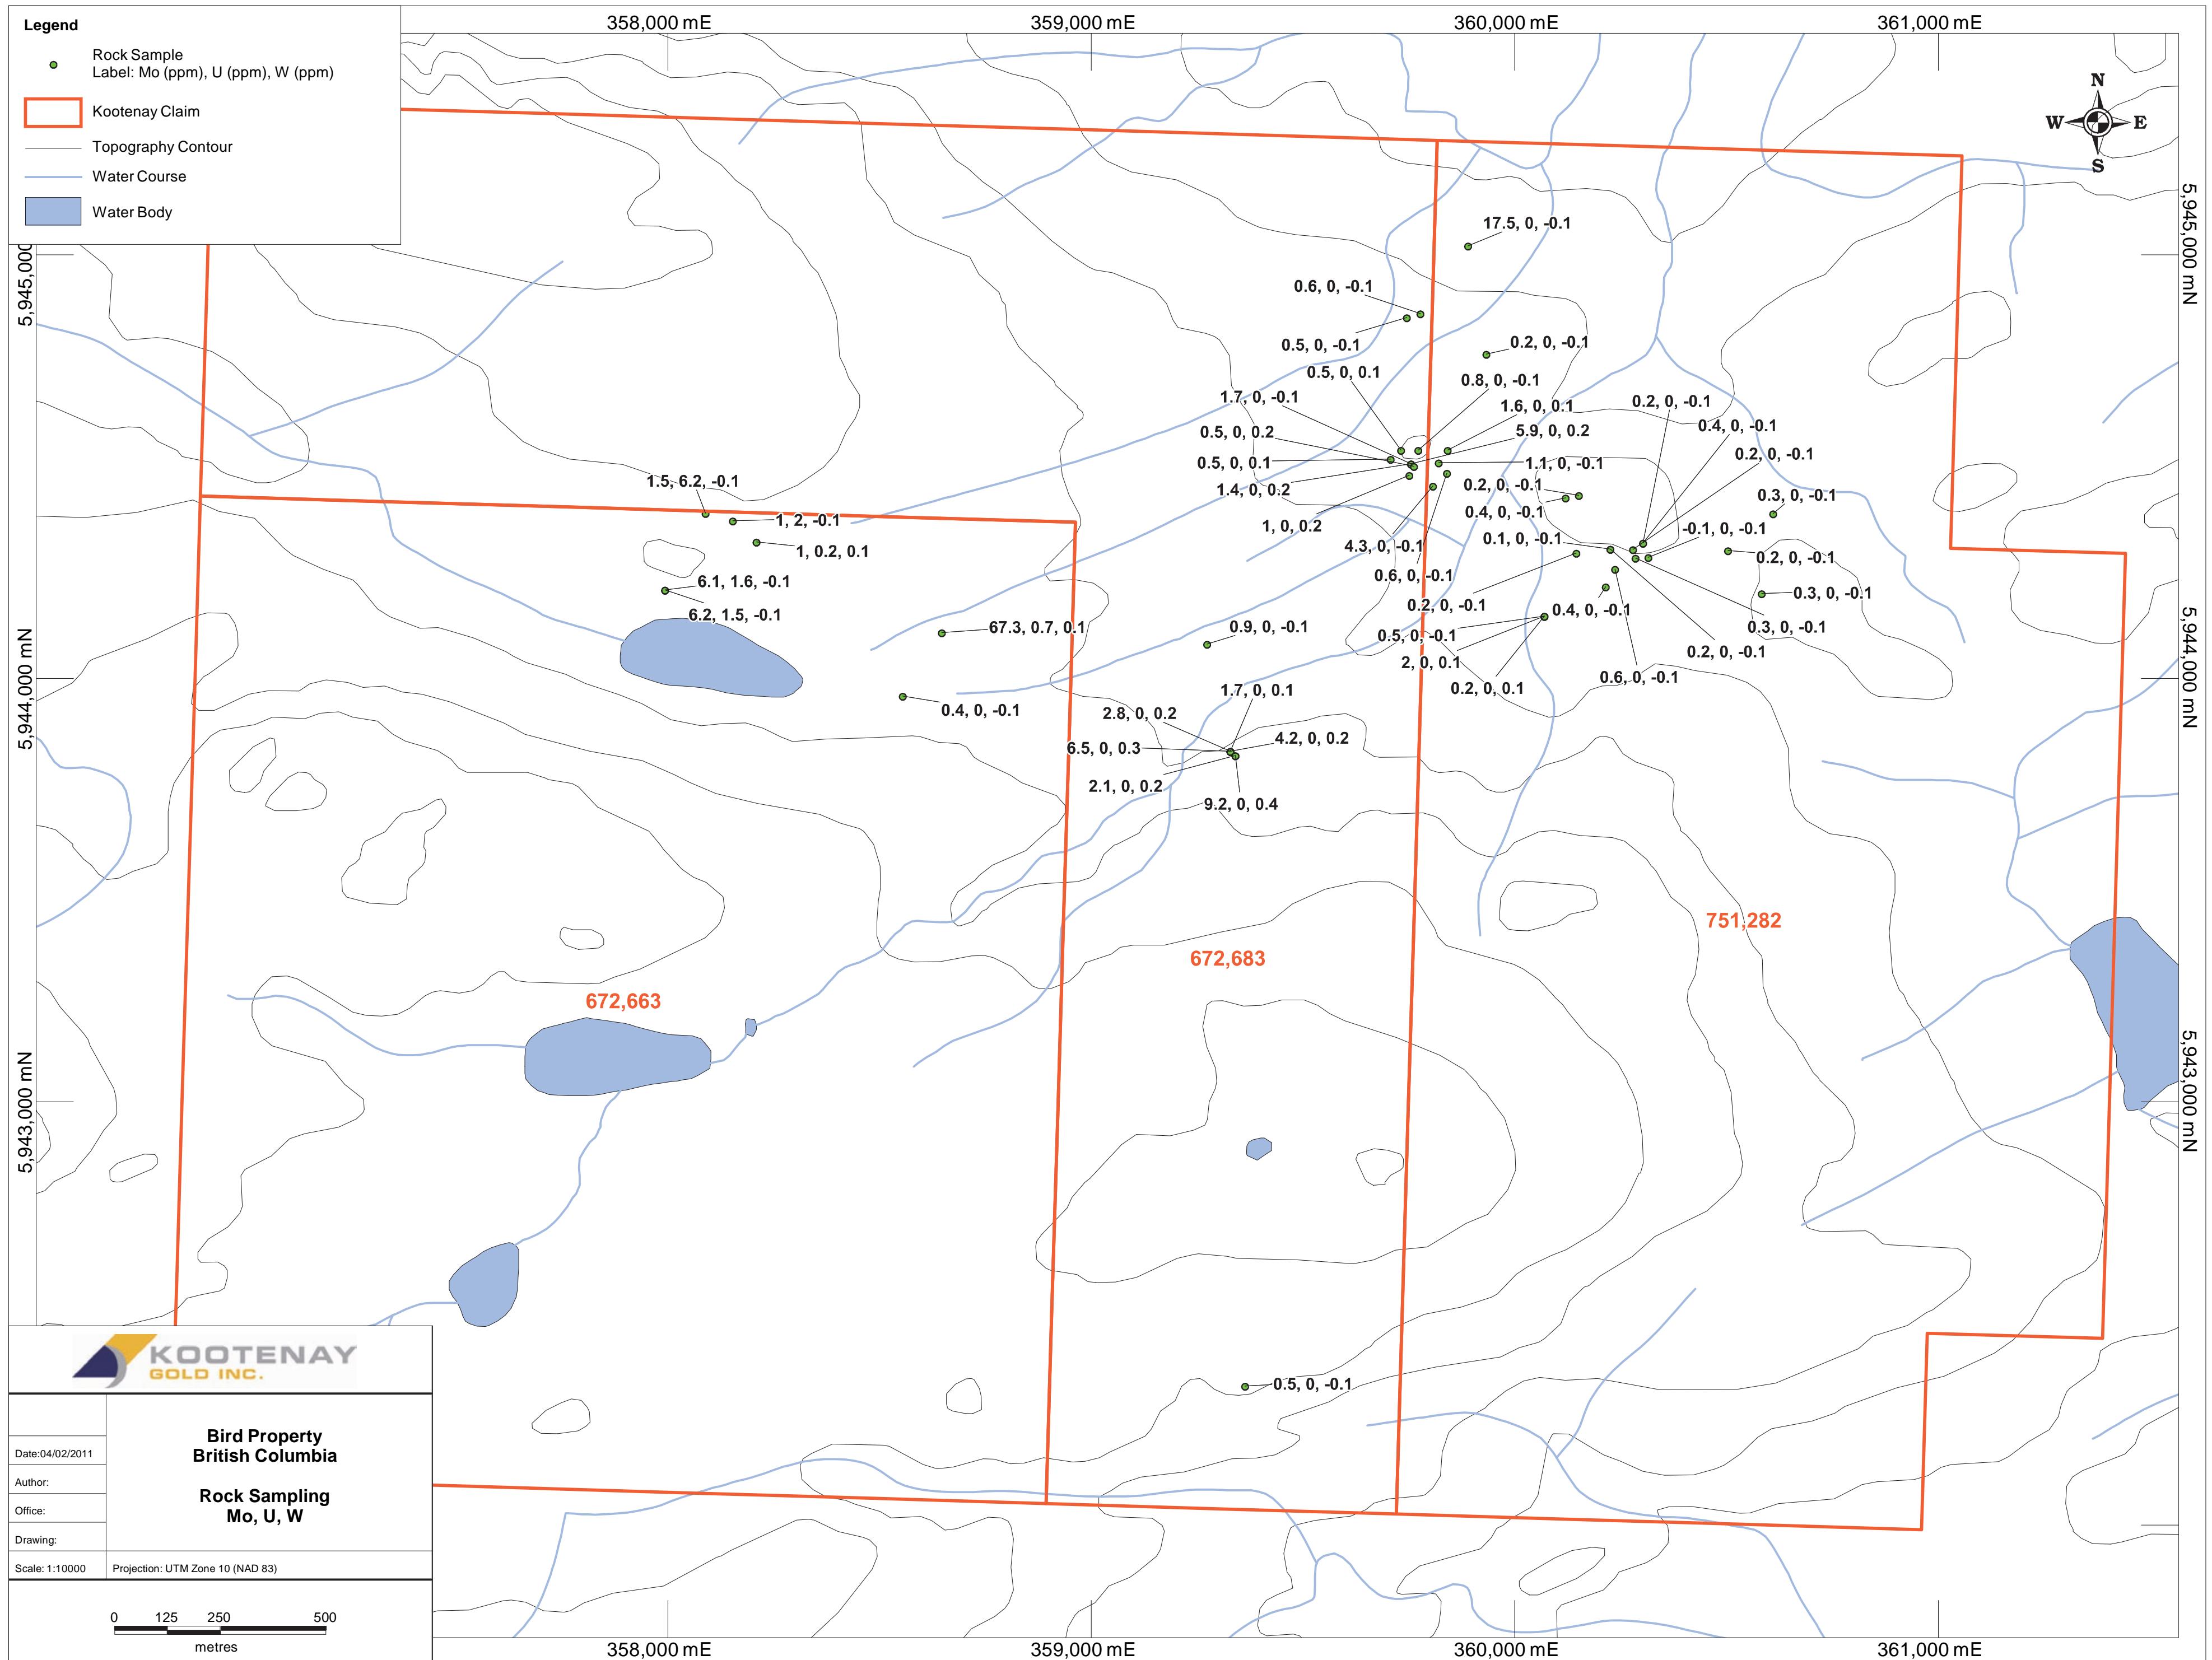

Sample No.	UTM E	UTM N	Property	Description
FC10-136	357993	5944209	Bird Lake	Rhyolite-yellow and red stained-hot spring
FC10-137	357993	5944209	Bird Lake	Same as above-very large angular float
FC10-138	358002	4944219	Bird Lake	Same as above
FC10-158	359707	5944518	Bird Lake	Rusty fractured andesite with epi veinlets
FC10-159	359731	5944539	Bird Lake	More silica flooding with veinlets
FC10-160	359751	5944480	Bird Lake	Same as above
FC10-161	359807	5944454	Bird Lake	Hornfel breccia
FC10-162	360070	5944147	Bird Lake	Breccia with copper staining
FC10-163	360070	5944147	Bird Lake	Same as above
FC10-164	360070	5944147	Bird Lake	Same as above except minor quartz veining
FC10-165	360145	5944296	Bird Lake	Quartz vein in serpentinized breccia
CK10 - 1066	358089	5944390	Bird	Agglo or diatreme? goethite some lim color "F" or "Ba"?
CK10 - 1067	358153	5944372	Bird	Same as above with Mn and jar and hem color
CK10 - 1068	358209	5944322	Bird	Diorite with "F"? Garnet?
CK10 - 1069	338110	5944354	Bird	Same as 1067
CK10 - 1070	338110	5944354	Bird	Same as above - little more alt
CK10 - 1071	358647	5944108	Bird	Boulder silicified breccia float micro veined diss py
CK10 - 1174	360120	5944426	Bird	Skarn andesite volcanics - epi, py, rare cupy, calcite, and garnet
CK10 - 1175	360151	5944432	Bird	Same as above but some epi veins
CK10 - 1176	359890	5945021	Bird	Float epi - coming from andesite - py and qtz vugs with minor cupy
CK10 - 1177	359777	5944861	Bird	Crackle breccia - py micro veins epi - calcite rare cupy solidifying
CK10 - 1178	359745	5944852	Bird	Same as above

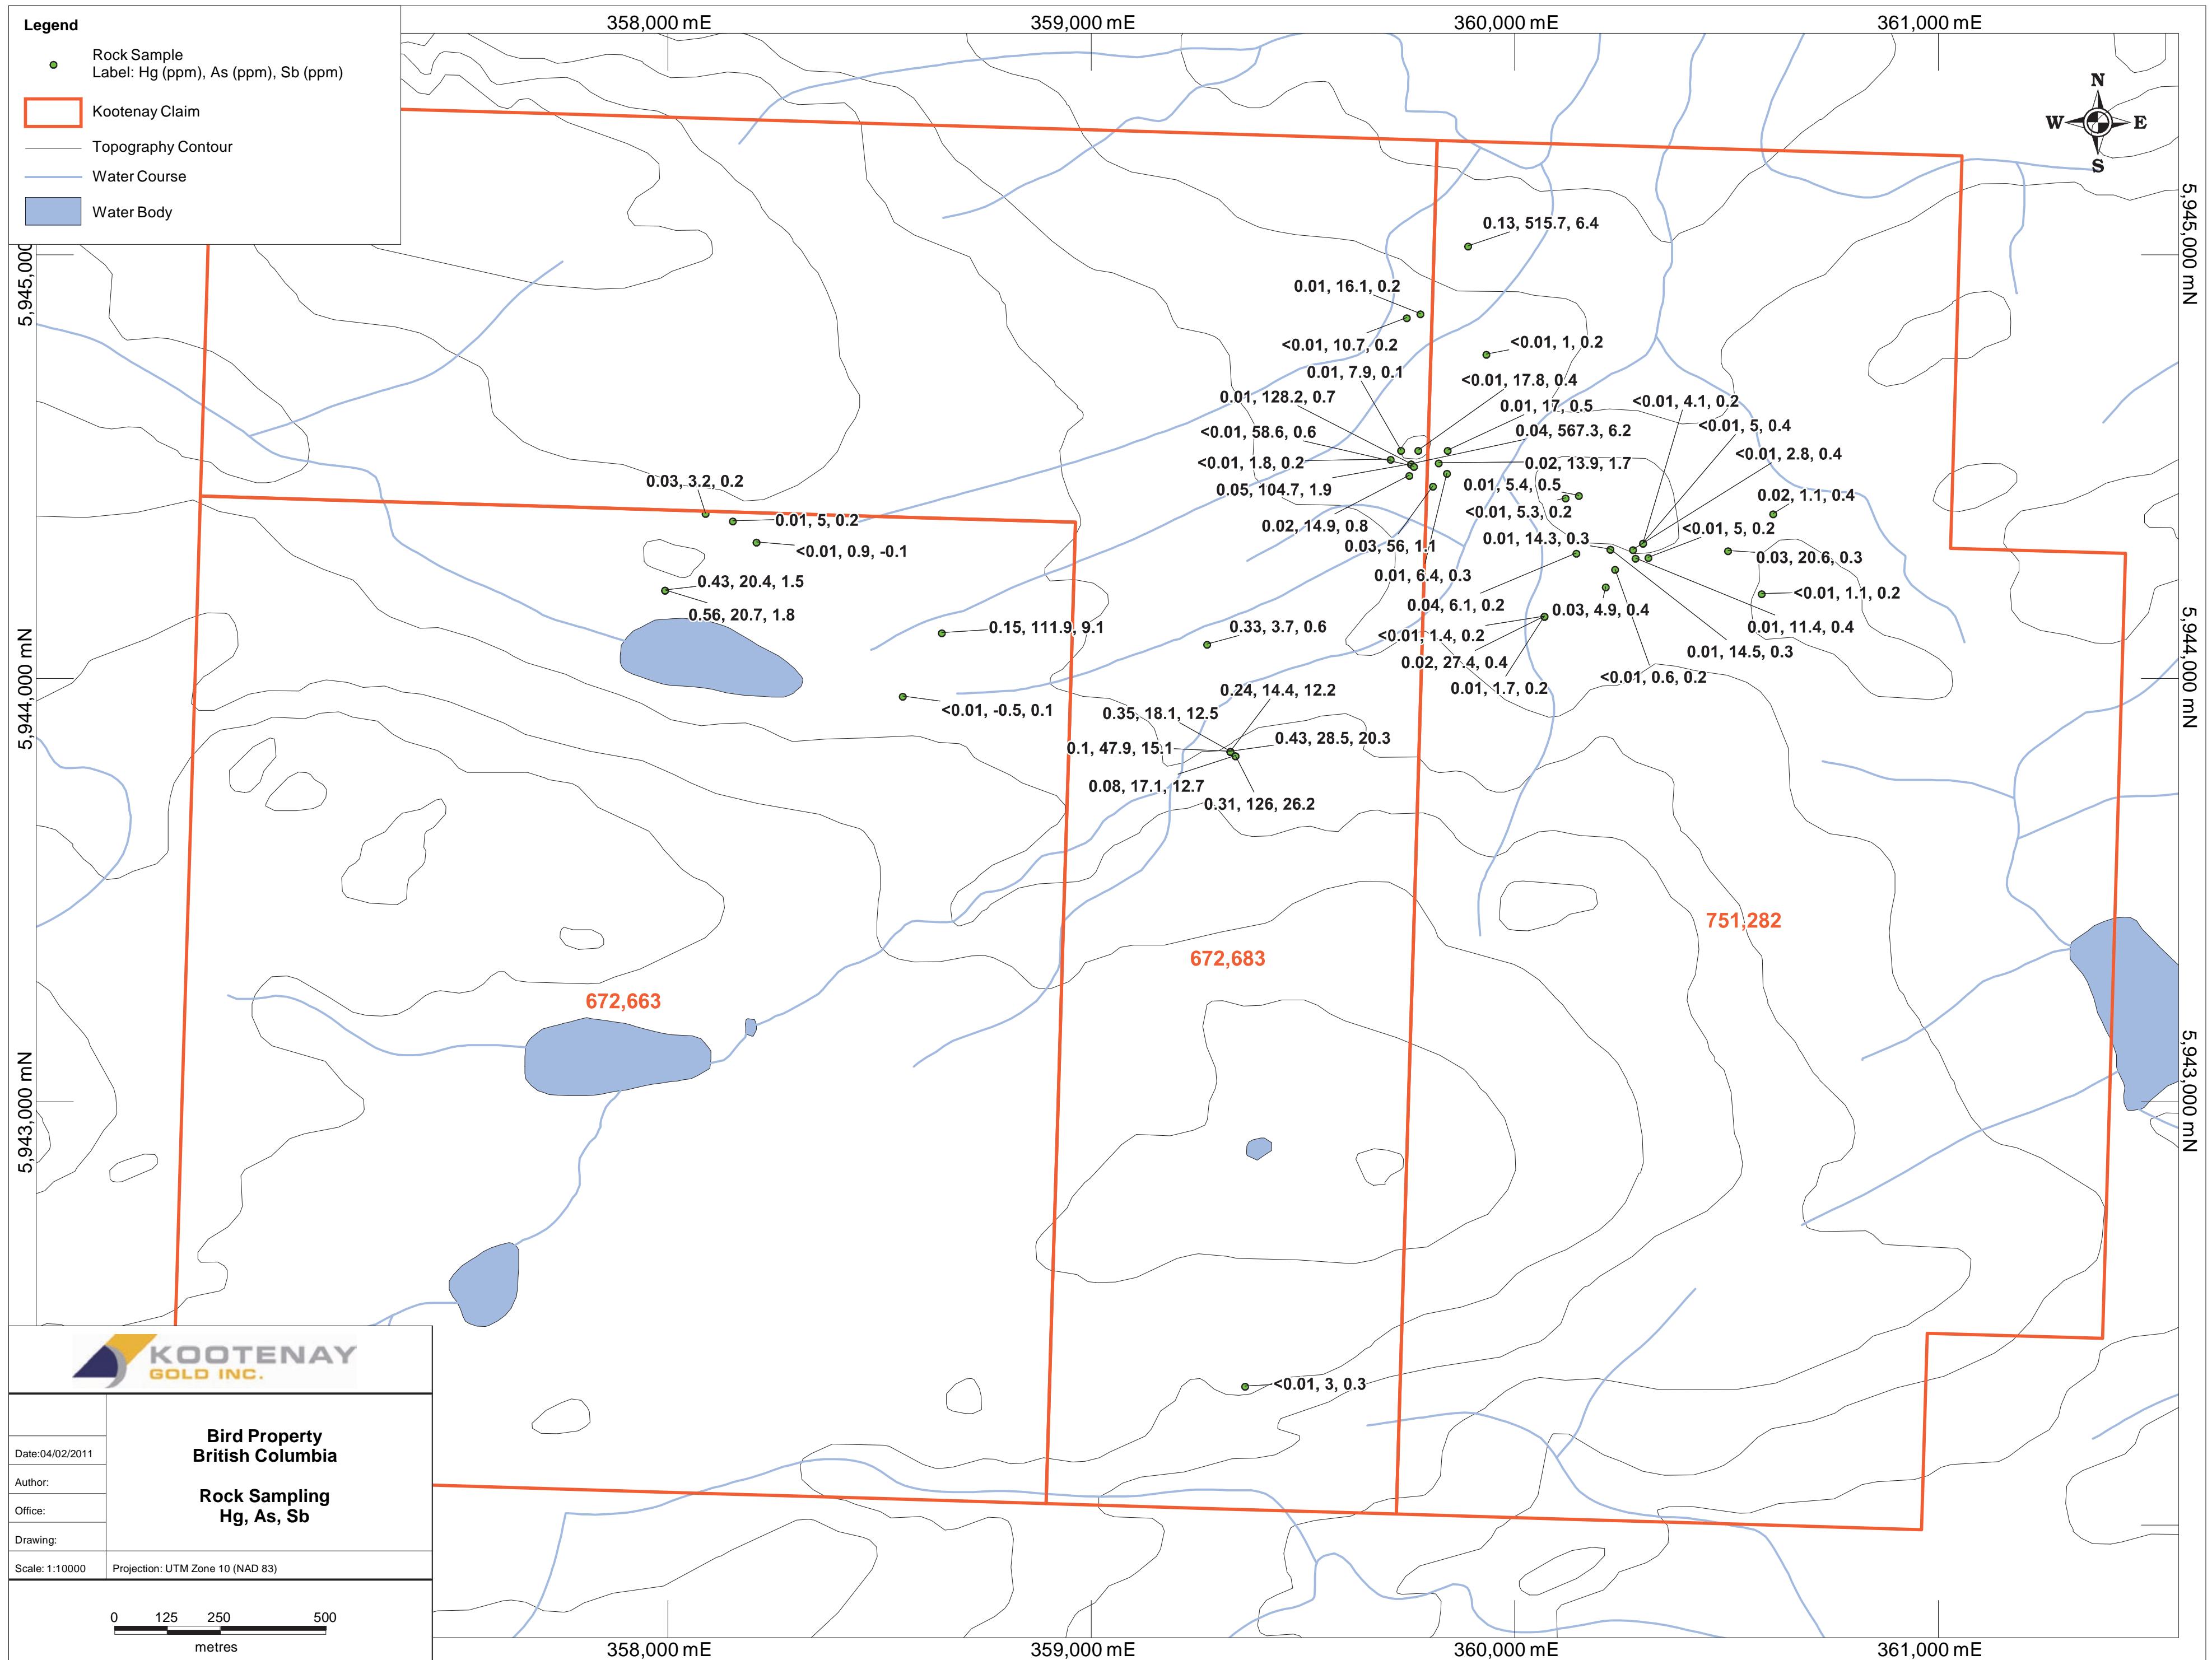

Sample No.	UTM E	UTM N	Property	Description
CK10 - 1179	359755	5944507	Bird	Andesite is breccia and has calcite and qrtz veins, py and cupy. Lots of fr, py, Mn, chlorite. Lots of dykes - diorite
CK10 - 1180	359755	5944507	Bird	Same as above
CK10 - 1181	359755	5944507	Bird	Same as above
CK10 - 1182	359762	5944501	Bird	Micro - macro epi veins py in coarser material diorite? Mn and lim stain
CK10 - 1183	359820	5944509	Bird	Narrow lim rich breccia
CK10 - 1184	359840	5944485	Bird	Dolomite and silica flooded - diss py. Same as above
CK10 - 1185	359841	5944539	Bird	Same as above
CK10 - 1186	359772	5944539	Bird	Pick up red chips
CK10 - 1187	359363	5942329	Bird	Basalt celadonite lim vugs in alt volcanic
CK10 - 1188	359273	5944081	Bird	Bleached rhyolite subcrop - jerosite and lim color
CK10 - 1189	359328	5943828	Bird	Silicified cong micro grey veins Fe hem stain
CK10 - 1190	359328	5943828	Bird	Same as above
CK10 - 1191	359328	5943828	Bird	Same as above
CK10 - 1192	359328	5943828	Bird	Breccia in amongst cong - black grey some hem lim stain
CK10 - 1193	359340	5943818	Bird	Composite of silicified cong "scabs" - Fe and hem color
CK10 - 1194	359340	5943818	Bird	Same as above
CK10 - 1195	358555	5943958	Bird	Breccia fr lim rich flow banded rhyolite
CK10 - 1196	359933	5944766	Bird	Silicified andesite py and fe
CK10 - 1197	360215	5944216	Bird	Silicified blue green andesite micro chl veins py and epi
CK10 - 1198	360237	5944258	Bird	Same type of porph more epi - some qrtz veins - rare cupy and py
CK10 - 1199	360279	5944304	Bird	Epidote alt andesite some fresh cupy
CK10 - 1200	360285	5944284	Bird	Epidote alt andesite porph blebs of weathered cupy
CK10 - 1201	360303	5944320	Bird	Quartz-calcite veins within epidote veining- minor Cu.

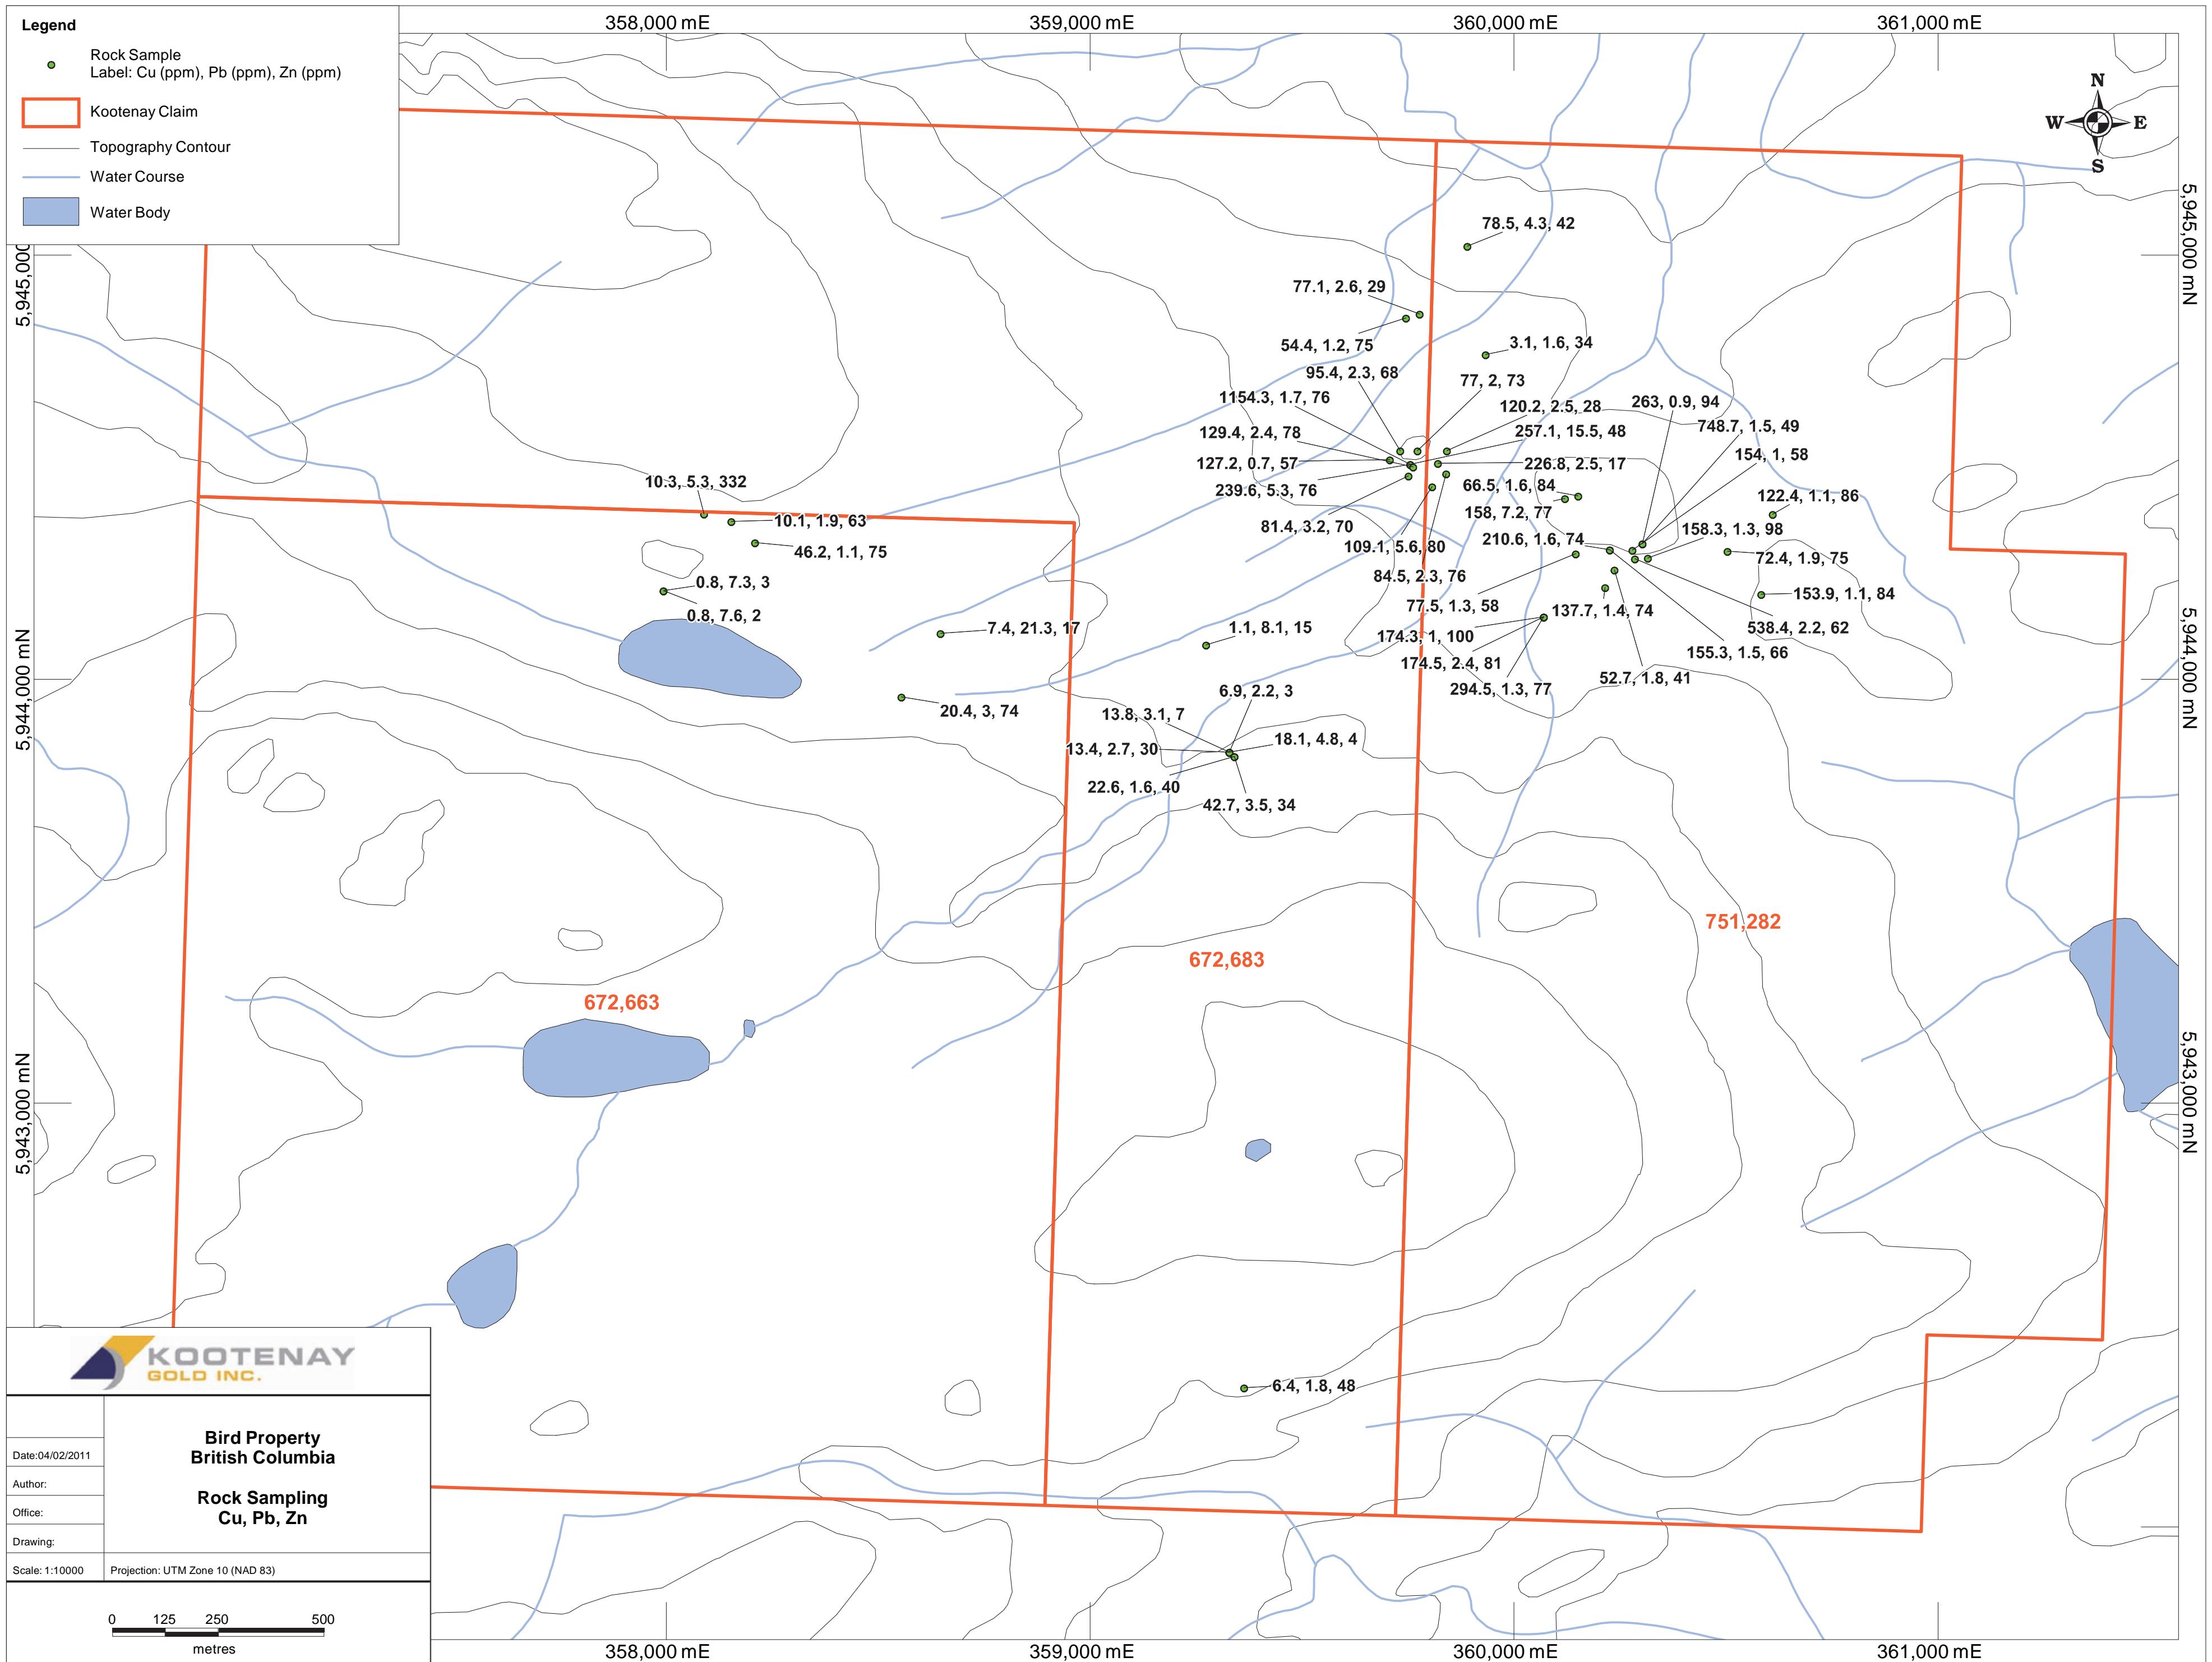

Sample No.	UTM E	UTM N	Property	Description
CK10 - 1202	360303	5944320	Bird	Quartz-calcite veins within epidote veining- minor Cu.
CK10 - 1203	360315	5944286	Bird	Quartz Epidote veining in small surface chips.
CK10 - 1204	360583	5944200	Bird	Andesite felspar phry-hem staining within minor Cu.
CK10 - 1205	360503	5944302	Bird	Same as 1208
CK10 - 1206	360226	5944305	Bird	Composite of epi rusty volcanic andesite with red blebs
CK10 - 1207	360226	5944305	Bird	Same as above
CK10 - 1208	360610	5944389	Bird	Composite red and brown chips "lim"

CERTIFICATE OF ANALYSIS

VAN10002913.1

CLIENT JOB INFORMATION

Project: Bird
Shipment ID:
P.O. Number
Number of Samples: 9

SAMPLE PREPARATION AND ANALYTICAL PROCEDURES

Method Code	Number of Samples	Code Description	Test Wgt (g)	Report Status	Lab
R200-250	9	Crush, split and pulverize 250 g rock to 200 mesh			VAN
1DX3	9	1:1:1 Aqua Regia digestion ICP-MS analysis	30	Completed	VAN

SAMPLE DISPOSAL

DISP-PLP Dispose of Pulp After 90 days
DISP-RJT Dispose of Reject After 90 days

ADDITIONAL COMMENTS

Acme does not accept responsibility for samples left at the laboratory after 90 days without prior written instructions for sample storage or return.

Invoice To: Kootenay Gold Inc.
Suite 920 - 1055 W. Hastings St.
Vancouver BC V6E 2E9
Canada

CC:

This report supersedes all previous preliminary and final reports with this file number dated prior to the date on this certificate. Signature indicates final approval; preliminary reports are unsigned and should be used for reference only. All results are considered the confidential property of the client. Acme assumes the liabilities for actual cost of analysis only. ** asterisk indicates that an analytical result could not be provided due to unusually high levels of interference from other elements.
