Summary

the claims tenure#'s 700664, 700827, 701146, 705562, 705563, 705712, 700683, Consisting of 44 units in the Lacy-Horne Lake area. Some of the area has had some work done on it in the past and has been a highly prospective area. Results from the area has shown Gold, Copper and Silver and some rare Earth occurrences. This is a reason for the ongoing selected small grids which were done to extend these showings with some success. Further work will be pursued on the advise of a licenced Geologist as soon as the weather permits. On his advice selected areas will be worked and sampled.

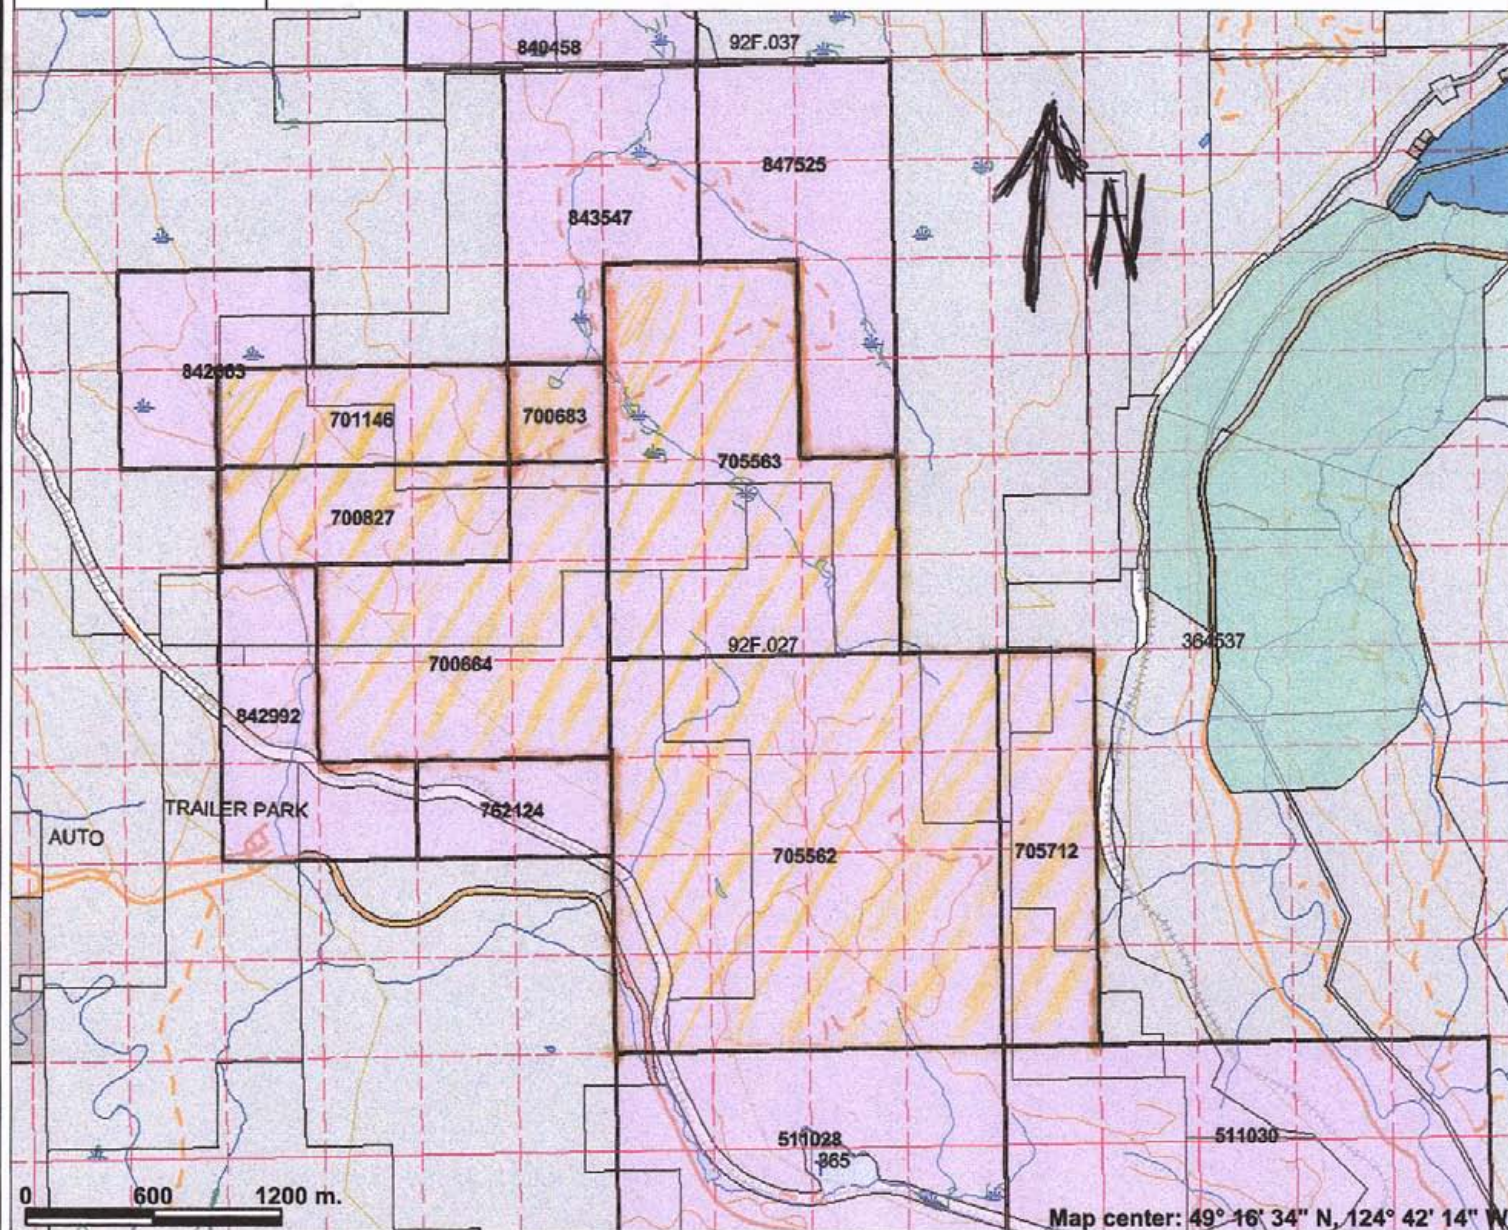

Geology

The geology of the grids and surrounding areas, are of different ages and types. This consists of the Duck Lake Formation, the Nitnat formation, McLaughlin Ridge formation, the Naniamo Group and the Karmutsen Formation. The property has several features, Esary Lake Iron formation, Lacy Lake Iron formation and Dacite Flows. The property has much the same geology as the Debbie 3 VMS occurrences and the Debbie gold occurrences.

Environment

The claims are situated in the Loon Lake, Lacy Lake area on the northern side adjacent to the Bitterroot Claims. Just off the Alberni highway the road is all gravel and for the most part, good. Logging is being done in the area and old roads are being reactivated and new roads are being excavated. Limited access is available mainly on the weekends and with permission from Timberwest with a permit, is allowed. A GPS reading to the claim access is posted on the report.

The claim is workable most of the year depending on weather conditions.
